Graphical User Interface Design In Java:

   Introduction to Graphical User Interfaces with Java Swing Paul Fischer,2005 Designing Graphical User Interfaces GUIs is a key component in developing attractive user friendly software This book is an introduction to programming GUIs using the Java Swing library for students who have a basic introductory knowledge of programming in Java Swing is gaining in popularity and is becoming the main Java library for programming GUIs The author takes a step by step approach introducing the basics of Swing to begin with and introducing increasingly more complex concepts as the reader s knowledge develops The book will show the reader how to design an interactive GUI display graphics and text in GUIs use the mouse to interact with the program download and display a web page in a GUI   *Graphical User Interface Design and Implementation for PostgreSQL Using Java* Feng Zhu,University of Wales Swansea. School of Physical Sciences. Computer Science,2005   **Professional Java User Interfaces** Mauro Marinilli,2006-05-01 This book covers the full development life cycle for professional GUI design in Java from cost estimation and design to coding and testing Focuses on building high quality industrial strength software in Java Ready to use source code is given throughout the text based on industrial strength projects undertaken by the author   *Graphical User Interface (GUI) Development for the Manipulation of Mobile Users in an AD-HOC Network* Jinu Rhee,2002   The Design and Development of an Internet-Based Graphical User Interface Using a Commercial Design Tool and Java ,2000 This paper describes the design and development of an Internet hosted Graphical User Interface GUI to plan digital aeronautical chart coverages for cockpit moving map displays by U S military aircraft mission planners requirements officers and aircrew The GUI is a component of the Moving Map Composer MMC software that has been developed by the Naval Research Laboratory at the Stennis Space Center NRLSSC MMC performs a wide variety of naval mission planning systems and in flight moving map displays   **Java Programming Graphical User Interface (GUI)** Neos Thanh, In this book I shall show you how to reuse the graphics classes provided in JDK to construct your own Graphical User Interface GUI applications Writing your own graphics classes and re inventing the wheels is mission impossible These graphics classes developed by expert programmers are highly complex and involve many advanced design patterns However re using them is not so difficult if you follow the API documentation samples and templates I shall assume you have a good grasp of OOP including inheritance and polymorphism otherwise read the earlier book I will describe another important concept called nested class or inner class in this article There are two sets of Java APIs for graphics programming AWT Abstract Windowing Toolkit and Swing AWT API was introduced in JDK 1 0 Most of the AWT components have become obsolete and should be replaced by newer Swing components Swing API a much more comprehensive set of graphics libraries that enhances the AWT was introduced as part of Java Foundation Classes JFC after the release of JDK 1 1 JFC consists of Swing Java2D Accessibility Internationalization and Pluggable Look and Feel Support APIs JFC has been integrated into core Java since JDK 1 2 Other than AWT Swing Graphics APIs provided in JDK others have

also provided Graphics APIs that work with Java such as Eclipse s Standard Widget Toolkit SWT used in Eclipse Google Web Toolkit GWT used in Android 3D Graphics API such as Java bindings for OpenGL JOGL and Java3D What You Will Learn Introduction Programming GUI with AWT AWT Event Handling Nested Inner Classes Event Listener s Adapter Classes Layout Managers and Panel Swing More on Swing s components Pluggable Look and Feel More on Layout Manager More on Event Handling Advanced Observer Design Pattern Advanced Composite Design Pattern Advanced More on Nested Classes Who This Book Is For If you are a JAVA developer who wants to learn more about developing applications with Graphical and scaling them with industry standard practices this is the book for you   Design and Analysis of Models for Java Graphical User Interface Software Development Liyun Zhang,1996   **A Methodology for Developing Multimodal User Interfaces of Information Systems** Adrian Stanciulescu,2008 The Graphical User Interface GUI as the most prevailing type of User Interface UI in today s interactive applications restricts the interaction with a computer to the visual modality and is therefore not suited for some users e g with limited literacy or typing skills in some circumstances e g while moving around with their hands or eyes busy or when the environment is constrained e g the keyboard and the mouse are not available In order to go beyond the GUI constraints the Multimodal MM UIs apear as paradigm that provide users with great expressive power naturalness and flexibility In this thesis we argue that developing MM UIs combining graphical and vocal modalities is an activity that could benefit from the application of a methodology which is composed of a set of models a method manipulating these models and the tools implementing the method Therefore we define a design space based method that is supported by model to model colored transformations in order to obtain MM UIs of information systems The design space is composed of explicitly defined design options that clarify the development process in a structured way in order to require less design effort The feasability of the methodology is demonstrated through three case studies with different levels of complexity and coverage In addition an empirical study is conducted with end users in order to measure the relative usability level provided by different design decisions   Social Computing and Social Media Gabriele Meiselwitz,2014-05-15 This book constitutes the refereed proceedings of the 6th International Conference on Social Computing and Social Media SCSM 2014 held as part of the 16th International Conference on Human Computer Interaction HCII 2014 in Heraklion Crete Greece in June 2014 jointly with 13 other thematically conferences The total of 1476 papers and 220 posters presented at the HCII 2014 conferences were carefully reviewed and selected from 4766 submissions These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers accepted for presentation thoroughly cover the entire field of Human Computer Interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The 56 papers included in this volume are organized in topical sections on designing and evaluating social computing and social media designing analyzing and visualizing social networks online communities and engagement presence and self in social media social media games gamification and entertainment
