

Report Writing

By Doug Knight

Why is an engineer in an English class?

Engineers must communicate - everyone must communicate somehow - writing is still the main method of communicating when you can't talk face to face

In my case, I have written reports on one subject and another all my career, and for six years I have been a technical writer

A technical writer translates the engineer's notes, drawings, etc into manuals that tell people how to use and fix things - writes many other things also

What kinds of writers are there? KEEP SHORT

Fiction - story tellers

Non-fiction - write about real things, or situations - just about any topic where the subject is real

Journalist

Historian

General non-fiction (cookbooks, how to books, investigations)

Technical (instruction manuals, reports, specifications)

Business (memos, reports, usually on an organisational - get things done - theme)

Advertising (everything in the best light)

Who is a writer writing for?

The reader

The reader is the most important person in the writing process

The writer must do the thinking for the reader - must answer all the questions that the reader will have - and answer them at the right time - the reader cannot stick up their hand

ALWAYS THINK OF THE READER

Combined Kansas Reports Kansas,1881 Included the reports of the executive officers and for many years those of the educational and charitable institutions **Handbook of Clinical Psychology in Medical Settings** Ronald H.

Rozensky,Jerry J. Sweet,Steven M. Tavian,2013-06-29 For two decades I have been responding to questions about the nature

of health psychology and how it differs from medical psychology behavioral medicine and clinical psychology From the beginning I have taken the position that any application of psychological theory or practice to problems and issues of the health system is health psychology I have repeatedly used an analogy to Newell and Simon's General Problem Solver program of the late 1950s and early 1960s which had two major functional parts in addition to the executive component One was the problem solving core the procedural competence the other was the representation of the problem environment In the analogy the concepts knowledge and techniques of psychology constitute the core competence the health system in all its complexity is the problem environment A health psychologist is one whose basic competence in psychology is augmented by a working knowledge of some aspect of the health system Quite apparently there are functionally distinct aspects of health psychology to the degree that there are meaningful subdivisions in psychological competence and significantly different microenvironments within the health system I hesitate to refer to them as areas of specialization as the man who gave health psychology its formal definition Joseph Matarazzo has said that there are no specialties in psychology cited in the editors preface to this book
