Everyday Math Aligned To Standards:

Strategic Education Research Partnership National Research Council, Division of Behavioral and Social Sciences and Education, Committee on a Strategic Education Research Partnership, 2003-07-25 Envision a cadre of leading scientists and practitioners working collaboratively on a highly focused program of education research that is tightly coupled with practice. Much of the research is carried out in school settings. Research influences educational practice and the outcomes in practice inform further research efforts. The Strategic Education Research Partnership SERP is designed to make this vision a reality. It proposes a large scale coherent program of research and development that would put the problems of educational practice at its center and focus on all stages necessary to influence practice. These include theory testing, the development and evaluation of instructional programs, the study of practice in context and attention to taking innovations to scale. This book explains the features of SERP and the ways in which it would address the major challenges of linking research and practice. It is a call to mobilize the nation's resources and political will, the power of scientific research and the expertise of our educators to create a more effective research and development program for improving student learning.

Learner-Centered Leadership Arnold B. Danzig, Kathryn M. Borman, Bruce A. Jones, William F. Wright, 2017-09-25 Many new approaches to school improvement are being proposed in the current climate of assessment and school accountability. This book explores one of these approaches, a new model of leadership training known as Learner Centered Leadership (LCL). It is built around the fundamental idea that learning and learning communities are natural processes that when properly harnessed can lead to the highest levels of professional engagement and problem solving. Key features of this exciting new approach to school leadership include the following: Broad based and Generative. The book's narratives vividly illustrate the extraordinary ability of LCL to generate new approaches to leadership development. For example, encouraging and assisting school leaders to reflect on their own leadership attributes relative to the implementation of the school mission to ensure high teacher efficacy and student learning. In this respect, the volume contributes significantly to the field of school leadership and professional development by extending above and beyond a narrow focus on instructional leadership. Practice Oriented: By creating communities that encourage conversation and analysis, the new data driven models of school improvement are more likely to be successfully implemented. Without analytical discourse, the process of interpreting school data and transforming it into practice would be largely lost. Conceptually Appropriate: The realization that everyone within a school—students, teachers, administrators—belongs to the same learning community minimizes status differences and encourages teamwork. The LCL administrator is much less likely to be authoritarian and power oriented and much more likely to be transformative and student outcome focused. This book is appropriate for master's level courses and certification seminars and for inservice workshops dealing with school leadership.
