**International Perspectives on Knowledge**

**Integration** Thomas Lehmann,2020-05-18 Interest in knowledge integration grew considerably in recent years particularly within the realm of pre service teacher education However studies on the topic conceptualize knowledge integration in diverse ways For example it may be conceived as a specific coherence building learning process which involves not only acquiring but interrelating knowledge of different types e g theoretical and practical or from different domains which together constitute a teacher s or educational specialist s professional knowledge base e g content knowledge pedagogical knowledge pedagogical content knowledge knowledge about using technologies for learning and instruction etc Furthermore knowledge integration also refers to the meaningful application of knowledge of different types and from various domains in order to act professionally and to teach successfully In many countries however future teachers and educational specialists often struggle with knowledge integration because the task of integrating knowledge across domains from various courses

and from practical training is left largely to the individuals Thus the efficacy and quality of higher education programs particularly in pre service teacher education could be improved through careful attention to knowledge integration International Perspectives on Knowledge Integration aims at facilitating the consideration of knowledge integration in teacher training and higher education in both research and practice Specifically it explores theoretical conceptions and methods and reports on original research and good practices for fostering knowledge integration It is thus of interest to researchers faculty board members and lecturers concerned with teacher training and higher education as well as to student teachers and students of pedagogy education and educational psychology
