SAFETY CONSIDERATIONS

Installing and servicing air conditioning equipment can be hazardous due to system pressure and electrical components. Only trained and qualified service personnel should install or service air conditioning equipment.

Untrained personnel can perform basic maintenance functions such as cleaning coils and filters and replacing filters. All other operations should be performed by trained service personnel. When working on air conditioning equipment, observe precautions in the literature and on tags and labels attached to unit.

Follow all safety codes. Wear safety glasses and work gloves. Use quenching cloth for brazing operations. Have fire extinguisher available.

⚠ WARNING

Before performing service or maintenance operations on system, turn off main power switches to unit. Turn off accessory heater power switch if applicable. Electric shock can cause personal injury.

Aquaculture Seawater Systems John E. Huguenin, John Colt, 1989 The primary objective of this book is to provide basic information and considerations needed for the design construction and operation of seawater systems for culturing purposes The seawater flow rate range of 10 1000 gallons approximately 40 4000 liters per minute has been chosen because it includes the vast majority of such systems currently in use While the objectives of these systems vary widely they all depend on a common technological and biological data base Since the seawater system is usually only a means to an end most potential users have little prior practical experience or technical knowledge in this area Practical information on seawater systems for culturing purposes tends to be fragmented and not readily available in usable form Most conventional engineering experience is with marine systems which are orders of magnitude larger This technology is often not readily scaled down or directly useable and more than likely prohibitively expensive The subject of this book crosses many different disciplines interests and backgrounds This can cause considerable confusion with definitions and units of measure
