Manual Dynisco Screen Changers:

Handbook of Plastic Processes Charles A. Harper, 2006-08-28 An outstanding and thorough presentation of the complete field of plastics processing Handbook of Plastic Processes is the only comprehensive reference covering not just one but all major processes used to produce plastic products helping designers and manufacturers in selecting the best process for a given product while enabling users to better understand the performance characteristics of each process. The authors all experts in their fields explain in clear concise and practical terms the advantages uses and limitations of each process as well as the most modern and up to date technologies available in their application. Coverage includes chapters on Injection molding, Compression and transfer molding, Sheet extrusion, Blow molding, Calendering, Foam processing, Reinforced plastics processing, Liquid resin processing, Rotational molding, Thermoforming, Reaction injection molding, Compounding, mixing and blending, Machining and mechanical fabrication, Assembly, finishing and decorating. Each chapter details a particular process, its variations, the equipment used, the range of materials utilized in the process and its advantages and limitations. Because of its increasing impact on the industry the editor has also added a chapter on nanotechnology in plastics processing.

Extrusion Harold F. Giles Jr., John R. Wagner Jr., Eldridge M. Mount III, 2013-09-21 The second edition of Extrusion is designed to aid operators, engineers and managers in extrusion processing in quickly answering practical day to day questions. The first part of the book provides the fundamental principles for operators and engineers of polymeric materials extrusion processing in single and twin screw extruders. The next section covers advanced topics including troubleshooting, auxiliary equipment and coextrusion for operators, engineers and managers. The final part provides applications case studies in key areas for engineers such as compounding, blown film extrusion, blow molding, coating, foam and reprocessing. This practical guide to extrusion brings together both equipment and materials processing aspects. It covers basic and advanced topics for reference and training in thermoplastics processing in the extruder. Detailed reference data are provided on such important operating conditions as temperatures, start up procedures, shear rates, pressure drops and safety. A practical guide to the selection, design and optimization of extrusion processes and equipment. Designed to improve production efficiency and product quality. Focuses on practical fault analysis and troubleshooting techniques.
