for Independent Authors Anthony Ekanem,2020-04-29 If you have ever dreamed of writing and publishing your own book you can realise that dream through self publishing Self publishing is the route many writers choose these days to make their works available to the reading public Self publishing today is different from what it used to be many years ago when authors had to spend a lot of money to publish their book Today authors can self publish their book for free or for as little as 100 depending on the self publishing platform they choose As a soon to be author the first thing you need to do to self publish a book is to know your genre One of the rules of writing is that you should write about what you know If you have a specific genre that you enjoy reading chances are that that is the genre you will want or like to write about Consider your interests and the types of book that you read before you decide on the genre you want to venture into Your major aim of writing a book should not be to make money It should be about something you have interest and passion for There a lot of genres available in both fiction and non fiction writing Before you start writing your book have a plan of what the book will be about and the genre it will fit in You need to focus on a specific genre when you are writing a book so you can market it Some books may cross genre lines such as paranormal and romance books while some books will fit neatly into a genre What your book is about should be very clear to the would be reader so they will be interested in what you have written to want to buy the book

Most readers have the types of books they like to read and have a habit of sticking to a few genres. There are different genres for both fiction and non-fiction books. You need to make sure your book stands out from other books in the same category. If you are writing a romance novel for instance, how do you make it stand out from other romance novels that are already in the bookstores? This is a question you must answer. Once you have determined your genre and know exactly what you want to write about, you should begin to think of marketing your book. Make it something that prospective readers will choose when they see it in bookstores or online. This will set it apart from other books of the same kind and lure readers to buy it. You can make a career out of self-publishing your books and marketing them to the right audience. After you have decided on what you are going to write about and what will make your book stand out from the rest, you can then begin to outline your book. You should write down an outline of the book and the points you are trying to make. Well-written books convey a message. Make sure your book conveys a good message to the readers that they can take away from the book. While you may like the free-form method of writing, which is writing without doing any sort of outline, you must still have an idea of the ending of the book in mind. If you are writing a fiction book, characters come alive as you write. The ending you have in mind may change as you rewrite the book, so it is important to be very flexible. The way you write depends on the type of person you are. If you wish to have everything ironed out for your book, then you must write down an outline that will tell you where you are heading. This is like having a roadmap for a car trip. Get a copy of this well-written book to learn all you need to know about self-publishing and how you can use it to your advantage.

How to Self-Publish Your Book

Dr. Jan Yager, 2019-08-07

A new world has opened to writers who wish to have their words turned into finished books. With technological advances in typesetting, printing, distribution, and sales, self-publishing has become a reality. But while converting your writing into a commercially available title may sound relatively easy based upon the claims of some companies that offer this service, there are many important considerations you should be aware of before going to press. Publishing expert Dr. Jan Yager has created an easy-to-follow guide that will take you from a book's conception and writing to its production and sales. Whether your work is fiction or non-fiction, *How to Self-Publish Your Book* offers sound and proven advice at every turn, enabling you to avoid common pitfalls along the way to becoming a self-published author. The book is divided into three parts. Part One takes you through the initial manuscript preparation, setting your goals, writing, sequencing, editing, and proofing, as well as creating a business plan for your book's eventual release. Part Two focuses on the actual production of your book. It explains the importance of cover and interior design, what you need to know about producing physical books and e-books, and how to turn your title into an audiobook. Part Three provides key information on how to market and sell your book, subjects that are crucial to a title's success but of which most writers have very little understanding. Also included is a valuable resource section that guides you to websites which offer essential information on self-publishing service providers, including complete self-publishing companies as well as freelance editors, proofreaders, printers, distributors, marketers, and publicists. Today, self-

publishing workshops and lecturers charge hopeful writers hundreds of dollars promising to turn their self published books into bestsellers The fact is that your book s chance of success starts at its origin not with the finished product However you choose to produce your book whether through a self publishing company or through separate services here is a complete road map to what lies ahead based not on hype or wishful thinking but on Dr Jan Yager s lifetime of experience in the world of publishing
