United States. War Department, 2023-10-05 The Manual for Noncommissioned Officers and Privates of Cavalry of the Army of the United States 1917 is a meticulously crafted guide that encapsulates the operational procedures, tactical training, and discipline expected of cavalry personnel during a pivotal moment in American military history. This manual embodies the pragmatic and instructive style typical of military literature, offering a wealth of detailed information on formations, equipment, and communication that underscores the evolving dynamics of cavalry warfare in the early 20th century. As World War I loomed, the text reflects both the historical context of American military preparedness and the desire to standardize practices among ranks to enhance effectiveness in battle. Authored by the United States War Department, this work draws on the extensive experiences and lessons learned from previous conflicts as military leaders recognized the necessity for structured training and the professionalization of enlisted men. The War Department's commitment to fostering a well-informed and disciplined cavalry force is evident, reflecting the broader changes in American military doctrine during a transformative period in global conflicts. For historians, military enthusiasts, and scholars of the early 20th century, this manual serves not only as a valuable document of military protocol but also as a fascinating glimpse into the mindset of a nation poised for international engagement. The clarity and specificity of its guidance make it essential reading for anyone interested in the evolution of military training and strategy.

International Committee of the Red Cross alongside a range of renowned experts embarked upon a major international study into current state practice in international humanitarian law in order to identify customary law in this area. This book is the result of that study a comprehensive analysis of the customary rules of international humanitarian law applicable in international and non international armed conflicts. Given that important treaties in this area have not yet been universally ratified this is a publication of major importance carried out at the express request of the international community. In so doing this study identifies the common core of international humanitarian law binding on all parties to all armed conflicts.
