La Fracture Coloniale:

Black France Dominic Thomas, 2007 Without a doubt one of the most important studies so far completed on literature in French grounded in the experiences of migrants of sub Saharan African origin Alec Hargreaves Florida State University France has always hosted a rich and vibrant black presence within its borders But recent violent events have raised questions about France's treatment of ethnic minorities Challenging the identity politics that have set immigrants against the mainstream Black France explores how black expressive culture has been reformulated as global culture in the multicultural and multinational spaces of France Thomas brings forward questions such as Why is France a privileged site of civilization Who is French Who is an immigrant Who controls the networks of production Black France poses an urgently needed reassessment of the French colonial legacy

France's Lost Empires, 2011

France's Lost Empires Kate Marsh, Nicola Frith, 2010-12-28 France's Lost Empires brings together ten essays that collectively investigate the historical cultural and political legacies of French colonialism and specifically the endings of the French empire's Combining analyses of three lost territories Canada India and Saint Dominique of the first French colonial empire that of the Ancien Régime with investigations of the decolonization of the new colonies of the second French overseas empire specifically in North Africa the essays presented here investigate the ways in which colonial loss has been absorbed and narrativized within French culture and society and how nostalgia for that past has played a fundamental role in shaping French colonial discourses and memories Beginning with the Haitian Revolution and its historicization during the 1820s and ending with an examination of the postcolonial republic at the end of the twentieth century the chronological structure of the volume serves to reveal the extent to which the memories of territorial loss have been sustained throughout French colonial

history and remain evident in current metropolitan representations and memories of empire In analyzing the longevity of these tropes of loss and nostalgia and their importance in shaping France's identity as a colonial power both during and after periods of colonization France's Lost Empires reveals a basic premise it is not simply successful conquest which creates a self-validating colonial discourse failure can do so too Indeed the pervasive and tenacious nostalgia for past colonial glories variously identified by the contributors to this volume suggests that for some the emotional attachment to France's colonies has not waned and remains today as it was in nineteenth century France

Race in Translation Robert Stam, Ella Shohat, 2012-05-28 While the term culture wars often designates the heated arguments in the English speaking world spiraling around race the canon and affirmative action in fact these discussions have raged in diverse sites and languages Race in Translation charts the transatlantic traffic of the debates within and between three zones the U S France and Brazil Stam and Shohat trace the literal and figurative translation of these multidirectional intellectual debates seen most recently in the emergence of postcolonial studies in France and whiteness studies in Brazil The authors also interrogate an ironic convergence whereby rightist politicians like Sarkozy and Cameron join hands with some leftist intellectuals like Benn Michaels i ek and Bourdieu in condemning multiculturalism and identity politics At once a report from various fronts in the culture wars a mapping of the germane literatures and an argument about methods of reading the cross border movement of ideas the book constitutes a major contribution to our understanding of the Diasporic and the Transnational

Historicising the French Revolution Carolina Armenteros, 2008 Three decades ago Fran ois Furet famously announced that the French

Revolution was over Napoleon's armies ceased to march around Europe long ago and Louis XVIII even returned to occupy the throne of his guillotined brother And yet the Revolution's memory continues to hold sway over imaginations and cultures around the world This sway is felt particularly strongly by those who are interested in history for the French Revolution not only altered the course of history radically but became the fountainhead of historicism and the origin of the historical mentality The sixteen essays collected in this volume investigate the Revolution's intellectual and material legacies From popular culture to education and politics from France and Ireland to Poland and Turkey from 1789 to the present day leading historians expose alongside graduate students the myriad ways in which the Revolution changed humanity's possible futures its history and the idea of history They attest to how the Revolution has had a continuing global significance and is still shaping the world today

The Construction of Minority Identities in France and Britain Gino G. Raymond, Tariq Modood, 2007-11-09 Britain and France have divergent attitudes to the issue of minority identities Whilst the British emphasise multiculturalism allowing that it is possible to combine race or faith with a British identity the French view such a combination of religion and nationality as unacceptable However recent events have challenged these traditional approaches to minorities The London bombings of July 2005 and the fact that the perpetrators were British threw into question the assumption that the elevation of difference could lead to community cohesion whilst riots in Birmingham in October 2005 between black and Asian communities further highlighted tensions Similarly French certainties about their proactive attitude to the integration of minorities into a national community unified by common value were profoundly shaken by rioting in urban areas

New Perspectives on the Black Atlantic Bénédicte Ledent, Pilar Cuder Domínguez, 2012 This collection of essays attempts to expand the notion of the Black Atlantic beyond its original racial geographical linguistic and cultural borders while acknowledging its remarkable ability to disturb established historical truths and to go beyond traditional dichotomies thereby providing an essential tool for cross cultural understanding It is divided into four sections each of them dealing with a different approach to the question of the Black Atlantic Definitions touches on the various limitations of Gilroy's original concept Readings focuses on how the Black Atlantic can be productively used in readings of certain literary texts Practices shifts towards the practical applications of the concept in order to explore the impact it has had on academic disciplines and examine to what extent it may have altered their epistemology and working procedures Finally Dialogues engages with the Black Atlantic from the perspectives of two creative writers whose work includes transatlantic themes and characters

Postcolonial Slavery Charlotte Baker, Jennifer

Jahn,2008 This collection of eight essays by research students and academics from the UK France Germany and the USA examining different forms and manifestations of postcolonial slavery underlines the significance of the year 2007 marking the bicentennial anniversary of the passage of the British law banning the slave trade Slavery and its legacies galvanized a diachronic series of ethnic crossings and transformations that engendered new and complex patterns of crosscultural contact And the importance of communities of runaway slaves can scarcely be overstated as a symbol of an insistent black resistance and self affirmation But in bringing the material realities of slavery to the forefront of the imagination this volume also highlights the marginalization of British and French colonial practices in institutionalized frameworks of historical knowledge Actively contesting the related traumas of transplantation the middle passage and the fracturing of the collective memory and drawing actively on a wide range of approaches and perspectives this collection seeks to reinscribe a material historical consciousness of slavery and its legacies through a strategic interaction between history subjectivity and representation H Adlai Murdoch University of Illinois at Urbana Champaign **The Maghreb Review** ,2008
