blend of practical exercises and expert guidance equips readers with the skills and confidence needed to tackle challenging coding interviews **Women's Albums and Photography in Victorian England** Patrizia Di Bello, 2017-07-05 This beautifully illustrated study recaptures the rich history of women photographers and image collectors in nineteenth century England. Situating the practice of collecting, exchanging and displaying photographs and other images in the context of feminine sociability, Patrizia Di Bello shows that albums express Victorian women's experience of modernity. The albums of individual women and the broader feminine culture of collecting and displaying images are examined, uncovering the cross-references and fertilizations between women's albums and illustrated periodicals and demonstrating the way albums and photography itself were represented in women's magazines, fashion plates and popular novels. Bringing a sophisticated eye to overlooked images such as the family photograph, Di Bello not only illustrates their significance as historical documents but elucidates the visual rhetorics at play. In doing so, she identifies the connections between Victorian album making and the work of modern day amateurs and artists who use digital techniques to compile and decorate albums with Victorian style borders and patterns. At a time when photographic album making is being re-vitalised by digital technologies, this book rewrites the history of photographic albums, placing the female collector at its centre and offering an alternative history of photography focused on its uses rather than on its aesthetic or artistic considerations. It is remarkable in elegantly connecting the history of photography with the fields of material culture and women's studies.

Advances in Systems, Computing Sciences and Software Engineering Tarek Sobh, Khaled Elleithy, 2006-08-15 The conference proceedings of the International Conference on Systems Computing Sciences and Software Engineering include a set of rigorously reviewed world class manuscripts addressing and detailing state of the art research projects in the areas of Computer Science, Software Engineering, Computer Engineering and Systems Engineering and Sciences. The International Conference on Systems Computing Sciences and Software Engineering (SCSS 2005) was part of the International Joint Conferences on Computer Information and Systems Sciences and Engineering (CISSE 2005). CISSE 2005, the World's first Engineering Computing and Systems Research E Conference, was the first high caliber Research Conference in the world to be completely conducted online in real time via the internet. CISSE received 255 research paper submissions and the final program included 140 accepted papers from more than 45 countries. The whole concept and format of CISSE 2005 was very exciting and ground breaking. The powerpoint presentations, final paper manuscripts and time schedule for live presentations over the web had been available for 3 weeks prior to the start of the conference for all registrants so they could pick and choose the presentations they want to attend and think about questions that they might want to ask. The live audio presentations were also recorded and are part of the permanent CISSE archive which includes all power point presentations, papers and recorded presentations. All aspects of the conference were managed online not only the reviewing submissions and registration processes but also the actual conference. Conference participants, authors, presenters and attendees only needed

an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground breaking conference The on line structure of this high quality event allowed academic professionals and industry participants to contribute work and attend world class technical presentations based on rigorously refereed submissions live without the need for investing significant travel funds or time out of the office Suffice to say that CISSE received submissions from more than 50 countries for whose researchers this opportunity presented a much more affordable dynamic and well planned event to attend and submit their work to versus a classic on the ground conference The CISSE conference audio room provided superb audio even over low speed internet connections the ability to display PowerPoint presentations and cross platform compatibility the conferencing software runs on Windows Mac and any other operating system that supports Java In addition the conferencing system allowed for an unlimited number of participants which in turn granted CISSE the opportunity to allow all participants to attend all presentations as opposed to limiting the number of available seats for each session The implemented conferencing technology starting with the submission review system and ending with the online conferencing capability allowed CISSE to conduct a very high quality fulfilling event for all participants
