

How to Write a Term Paper Proposal

For any student writing a research paper, the proposal is the most important step in the process. The quality of your proposal can be the deciding factor in whether the review board accepts your topic. Here are some steps to help you write a proposal for a research paper. (1500 – 1800 words)

Instructions

1. Write a catchy title. Think of something that will grab the reader's attention and keep them interested. Be as concise as possible.
2. Write the introduction. State the purpose of the study, demonstrate your knowledge of the topic and its importance, describe any major issues and key research points, pinpoint the variables and explain any boundaries of the study.
3. Provide a resource review. This section outlines all sources you have used in your research and shows your knowledge on the topic. It also gives credit to those who have done previous research on this subject and developed the framework for your research.
4. Explain the implementation of your methods. Demonstrate your knowledge on the methods you used and explain how they benefit your research.
5. Predict your results. You have no results at this stage, but it is suggested that you have some idea of the data you will collect and what kinds of procedures will be used to answer your question or hypothesis.
6. Discuss the potential impact of your results. Readers will want to know the benefits and possible drawbacks of your research.

Tips & Warnings

- Be sure to thoroughly understand the structure and functions of each part of your research paper proposal.
- Be confident in your potential results. This will improve the credibility of your paper and make readers more apt to identify with your research and approve your proposal.
- Have a third-party review and edit your proposal.

How to Make an Introduction

Effective research papers are not written in one day. It takes weeks of preparation to create a well-researched paper with a strong structure and authoritative references. Students assigned research papers are sometimes required to submit a proposal -- usually three to four pages in length -- that demonstrates the manner in which you will write the paper. This proposal is an important step because it will become the foundation upon which you write your paper. Before writing the proposal, create an outline that addresses all the main points you will cover.

Your introduction sets the tone for your research paper and provides the reader with a first impression of your writing and your thesis. Follow a few guidelines listed below and find yourself writing effective introductions that convince your readers that your thesis and research are worth their time and attention.

Grab the reader's attention with a fact, question, quote, analogy or short, interesting narrative supporting the thesis. This should set the tone for your paper while triggering the reader's interest

How To Write A Term Paper Proposal:

Reading Empirical Research Studies John R. Hayes, Richard E. Young, Michele L. Matchett, Maggie McCaffrey, Cynthia Cochran, 2020-10-07 For the most part those who teach writing and administer writing programs do not conduct research on writing. Perhaps more significantly they do not often read the research done by others because effective reading of articles on empirical research requires special knowledge and abilities. By and large those responsible for maintaining and improving writing instruction cannot without further training access work that could help them carry out their responsibilities more effectively. This book is designed as a text in graduate programs that offer instruction in rhetoric and composition. Its primary educational purposes are to provide models and critical methods designed to improve the reading of scientific discourse to provide models of effective research designs and projects appropriate to those learning to do empirical research in rhetoric.

Aiming to cultivate new attitudes toward empirical research this volume encourages an appreciation of the rhetorical tradition that informs the production and critical reading of empirical studies. The book should also reinforce a slowly growing realization in English studies that empirical methods are not inherently alien to the humanities rather that methods extend the power of humanist researchers trying to solve the problems of their discipline. *Quality Research Papers* Nancy Jean Vyhmeister, Terry Dwain Robertson, 2020-05-19 This will be the fourth edition of a time tested resource for students writing papers in the fields of religion and theology. It provides essential guidance for writing assignments typical in graduate programs in religion and has served as a standard textbook for seminary research courses. The fourth edition is updated to include information on Turabian 9th edition, SBL Handbook 2nd edition, new resource lists and additional help with online resources and formatting issues. Most importantly this new edition is revised from the perspective of information abundance rather than information scarcity. Today's research mindset has shifted from find anything and be satisfied with anything to choose intentionally reliable and credible sources. *Quality Research Papers* will guide students through an overabundance of online and library resources and help them craft excellent essays.
