

Observation In The Math Classroom

Observations for Jose took place on his science and math classrooms respectively. At the beginning of the class, the teacher asked a question to the group, Jose raised his hand to answer. He remained quiet on his desk while teacher explained the lesson in detail to the whole class. During the rest of the class, he remained seated on his desk and participated in the discussion at the proper time. The teacher showed a video to the class and asked some questions, most of the class tried to answer them, but Jose didn't seem interested as he was with his head down on his arms. Next Day during the math period, students were working in small groups. Jose actively participated in the class discussion. He reviewed his paperwork with his peers and asked a few questions to the teacher's assistant. Jose followed the teacher commands until the class finished. During the interview process, Jose mentioned that his favorite subjects were reading and science, conversely the subject that gives him most trouble is English because kids in the class laugh at him. Jose thinks that learning is natural for him and he can complete assigned works but doesn't feel being as smart as the other students. When with his friends, he likes to hang out, play games and soccer. About his other classmates, he stated not getting along with them because they are always pushing or tickling him. Jose reported having no problems with the teachers or at school in general. On weekends, he usually enjoys of playing with

Airasian, 2001 Airasian presents complex concepts clearly so that pre service teachers can understand them and solidly grounds these concepts in best practice through practical real well integrated examples He talks to not at users The text conceives of classroom assessment in a broader way than many other texts It focuses not only on the assessment needs of testing grading interpreting standardized tests and performance assessments but also on assessment concerns in organizing a classroom at the start of school planning and implementing instruction and strategies of teacher self reflection It views classroom assessment as an everyday ongoing integral part of teaching not something that is separated from life in classrooms The text is organized in a manner that follows the natural progression of teacher decision making from organizing the class as a learning community to planning and conducting instruction to the formal evaluation of learning and finally to grading **Ideas for Urban/rural Gifted/talented**, 1977 Practicing experts in education tell about their experiences insights and implications in urban rural areas **Developing and Using Classroom Assessments** Albert Oosterhof, 2003 This brief inexpensive book focuses on how to write construct and use assessments in the classroom It continues to take a balanced approach to assessment involving both traditional and innovative techniques It includes the development and use of written tests informal assessments portfolios and performance assessments This balanced approach to assessment is what prospective teachers need when they get into the classroom Coverage includes integrating assessments into the learning process showing the implications of research in cognitive psychology and showing how classroom assessments can facilitate transfer of learning and development of problem solving skills For professionals in the field of Educational Psychology or

anyone interested in teaching methods **Assessment in the Classroom** Peter W. Airasian, 1996 The special mission of *Assessment in the Classroom* is to show how assessment principles apply to the full range of teacher decision making from organizing the class as a social system to planning and conducting instructions to the formal evaluation of learning and finally to grading The goal is to show students that assessment is an everyday ongoing part of their teaching not some esoteric affair that is divorced from their daily routine With this in mind the following features have been built into this text
