Principles of Scientific Writing and Biomedical Publication Phil B. Fontanarosa, Annette Flanagan, Philip Greenland, 2024. Publication of biomedical research is essential for improvement and advancement of medical science and clinical practice. The history of scientific publication, including journals devoted to medical science, dates to the 1600s. The number of peer-reviewed scientific journals is estimated to be in the tens of thousands, and the number of journals, especially with the increasing creation of open access publications, continues to expand. Yet despite the long history and ubiquitous nature of scientific publications, the core principles involved in biomedical publication, as well as the specific skills of writing and manuscript preparation, are not commonly taught in a formal or comprehensive way in medicine, public health, or research curricula. What Every Medical Writer Needs to Know Robert B. Taylor, 2015-08-29. This book presents must-know facts generally not covered in How To books about medical writing. Every medical writer, whether a beginner or veteran, needs answers to questions many might not even know to ask. How does your personality type influence your writing behavior, and what can you do to make writing easier for you? What should you ask before agreeing to co-author an article for publication or write a book chapter? What are some of the current issues regarding copyright and plagiarism that authors may face? What has research discovered about quotations and references found in journal articles? What do you need to know about open access journals and predatory publishers? Dr. Taylor tells some surprising truths about medical publishing, including possible sources of peer review bias and some alarming influences on what ends up in print. He also relates little-known stories about renowned medical writers such as Sir William Osler, William Carlos Williams, and Elisabeth Kbler-Ross, and the origins of some of medicine's classic publications. *What Every Medical Writer Needs to Know* provides information vital for every health care professional who aspires to write for others: to read, academicians, and practicing physicians, nurses, nurse practitioners, and physician assistants, and professional medical and scientific writers.

in Education? Carol A. Mullen,2018-11-09 Creativity Under Duress in Education introduces a new framework creativity
under duress in education Leading creativity researchers and educational scholars discuss creative theory and practice from
an educational lens that is provocative Across international contexts this book combines insights from creativity and
educational research rich illustrations from classrooms schools and other professional settings and practical ideas and
strategies for how anyone invested in education can support creative teaching and learning Readers will encounter diverse
perspectives from an international cast of authors exploring cutting edge ideas for creativity and innovation as a foremost
priority for economies in the new millennium At the same time they consider forces of authority control and constraint that
impact creative education and innovation within educational systems extending to the professions Educators and those
interested in the future of education are vitally important to this conversation around research based and practical analyses
of creativity in and beyond the classroom Addressed are these major issues 1 creativity frameworks of theory and action in
education 2 research investigations into creativity and education and 3 applications of creativity theory in real world practice
Dynamic this book presents a bridge between draconian contexts of assessment and explosive creativity in diverse places A
key contribution of the volume is its validation and promotion of creativity and innovation for students teachers professors
leaders employers policymakers and others seeking ways to profoundly improve learning and transform education In tackling
the seemingly irreconcilable issues of creativity and accountability in K 12 institutions higher education and policy circles
