Accounting: A Beginner's Crash Course to Financial Literacy (The Ultimate Guide to Accounting for Beginners - Learn the Basic Accounting Principles)

Daniel Conner, 101-01-01 This book is intended for people who want to know something about the fundamentals of financial accounting without becoming an accountant. Many people are in this position: small business owners, employers, employees, business owners, stockholders, investors, and many, many more. Most of these folks do not need a deep understanding of accounting; they just need to learn what accounting is and how they should be using it. Just as important, they need to understand what accountants are talking about in their reports. They must learn the vocabulary and the most important terms. If you are one of those, you have found the right book for you. Discussed in this book: Management accounting and its importance, Management accounting principles, Responsibility accounting, Understanding and managing costs, Budgeting like a pro, Forecasting tools for business trends, Theory of constraints, Careers in management accounting, And much, much more. Many people lead busy lives once they start their career and they may not have time or hundreds of dollars to spend on an accounting class. This book is designed for the 2024 and the future years. For those people, as well as for students that may need a little more help to understand accounting.
