Handbook of Research on Social, Cultural, and Educational Considerations of Indigenous Knowledge in Developing Countries Ngulube, Patrick, 2016-09-29 Knowledge systems are an essential aspect to the preservation of a community's culture. In developing countries, this community-based knowledge has significant influence on such things as decision making and problem solving. The Handbook of Research on Social, Cultural, and Educational Considerations of Indigenous Knowledge in Developing Countries is an authoritative reference source for the latest scholarly research on the importance of knowledge and value systems at the community level and ways indigenous people utilize this information. Highlighting impacts on culture and education in developing nations, this book is ideally designed for researchers, academicians, policy makers, students, and professionals interested in contemporary debates on indigenous knowledge systems.

River Delta Futures Francisco-J. Hernández Adrián, Angelos Theocharis, 2025-02-20 How are climate change weather-related disasters, food and water insecurity, and energetic and infrastructural collapse narrated audiovisually in the most environmentally vulnerable areas of the Planet? This book addresses this and related questions by adopting a local and transdisciplinary perspective on river deltas from different areas of the world. River deltas have historically been hotspots for human civilizations, as populations settled in their fertile grounds seeking resources and opportunities for prosperity. Despite this, the terrains and livelihoods of those who rely on them are under threat from human exploitation, environmental degradation, and rapidly accelerating climate change. Inspired by the UN Sustainable Development Goals, this book provides a range of focused audiovisual analyses of deltaic spaces. Ranging across a variety of media including documentary filmmaking, animation, photography, collaborative comic making, participatory visual art practices, soundwalking, and film analysis, it examines the role that contemporary audiovisual media play in forging global environmental imaginaries. In doing so, it adopts a transdisciplinary approach to the Blue Humanities from countries across the world, including Canada, Bolivia, Brazil, Greece, Nigeria, Senegal, India, Bangladesh, Myanmar, Thailand, and Vietnam.

Regulation and the Global Financial Crisis Daniel Cash, Robert Goddard, 2020-11-24 The Financial Crisis was a cross-sector crisis that fundamentally affected modern society. Regulation, as a concept, was both blamed for allowing the crisis to happen but also tasked with developing and implementing solutions in the wake of the crash. In this book, a number of specialists from a range of fields have contributed their insights into the effect of the Financial Crisis upon the regulatory frameworks affecting their fields, how regulators have responded to the Crisis, and then what this may mean for the future of regulation within those industries. These analyses are joined by a picture of past financial crises which reveals interesting patterns and then analyses of architectural regulatory models that were fundamentally affected by the Crisis. The book aims to allow sector specialists the freedom to share their insights so that potentially a broader picture can be identified. Providing an interesting and thought-provoking account of this societally impactful era, this book will help the reader develop a more informed understanding of the potential future of financial

regulation The book will be of value to researchers students advanced level students regulators and policymakers
