Limpossible Capitalisme Vert:

L'impossible capitalisme vert Daniel Tanuro, 2015-03-12 Dans la logique de La Simplicité volontaire contre le mythe de l'abondance de Paul Ariès et de Au temps des catastrophes d'Isabelle Stengers ce livre articule les luttes économiques et sociales au combat pour la protection de l'environnement Cette édition numérique reprend l'identique la deuxième édition de 2012 D'un côté trois milliards de gens vivent dans des conditions indignes de l'humanité Enseignement sans énergie eau alimentation mobilité logement individuellement leurs besoins sont modestes mais au total ils sont énormes Les satisfaire n'est possible qu'en augmentant la production matérielle De l'autre côté deux cents ans de productivisme ont mené le système climatique au bord de l'infarctus viter que les changements climatiques s'emballent et frappent des centaines de millions d'êtres humains impose de réduire radicalement les missions de gaz effet de serre Donc la consommation des énergies fossiles n'est plus nécessaire aujourd'hui la transformation des ressources prélevées dans l'environnement Donc la production matérielle Comment stabiliser le climat tout en satisfaisant le droit légitime au développement de celles et ceux qui n'ont rien ou si peu et qui sont en même temps les principales victimes du réchauffement C'est le casse-tête du siècle Dans ce livre Daniel Tanuro propose de concilier l'écologie et le projet socialiste parce que le capitalisme ne saura rien résoudre Contre les sceptiques il montre le fonctionnement exemplaire des scientifiques au sein du GIEC mais aussi comment les gouvernements sous-estiment en permanence ses recommandations Il montre aussi que le marché du carbone a pour principal résultat d'enrichir et de renforcer les grands pollueurs ceux qui ont intérêt à brûler des combustibles fossiles le plus longtemps possible Si l'on n'est pas capable d'articuler les luttes économiques et le combat pour la protection de l'environnement le capitalisme causera des catastrophes sociales et environnementales de grande ampleur Quelles erreurs ceux qui se réclament du socialisme ont-ils commises pour que cette articulation semble aujourd'hui si difficile Cette édition numérique reprend l'identique la deuxième édition de 2012

Critical Strategies for Ecological Architectures Mathias Rollot, 2025-09-30 This book addresses the alarming state of the planet and considers a potential new role for architecture in the Anthropocene It explores ways in which architecture could contribute to solutions as well as how the discipline should prepare for the future Drawing on other disciplines such as bioregionalism animalism and decolonial thinking it demonstrates how architecture can extend its relevance The book introduces new theoretical approaches that encourage completely different ways of thinking showing and designing It introduces concepts such as human energy decolonial bioregionalism and emancipatory architecture which serve to challenge anthropocentric theories and promote more sustainable architectural practices This book makes an ethical appeal to architects and non architects alike proposing new strategies for thinking teaching and creating a wholly different kind of architecture for a rapidly changing world In doing so it addresses the challenges facing contemporary societies and ecological changes demonstrating how the ecological humanities can transform architecture as a field and radically alter its history references values and aims The book aims to contribute to a metamorphosis of architecture towards greater

ecological and emancipatory capacity and towards pluriversal bioregions *Representations and Rights of the Environment* Sandy Lamalle, Peter Stoett, 2023-04-06 Attending to the Cry of the Earth requires a critical appraisal of how we conceive our relationship with the environment and a clear vision of how to apprehend it in law and governance Addressing questions of participation responsibility and justice this collective endeavour includes marginalised and critical voices featuring contributions by leading practitioners and thinkers in Indigenous law traditional knowledge wild law the rights of nature theology public policy and environmental humanities Such voices play a decisive role in comprehending and responding to current global challenges They invite us to broaden our horizon of meaning and action modes of knowing and being in the world and envision the path ahead with a new legal consciousness A valuable reference for students researchers and practitioners this book is one of a series of publications associated with the Earth System Governance Project For more publications see www.cambridge.org/earth-system-governance Communism and Strategy Isabelle Garo, 2023-04-18 If the question of communism is making a comeback today this renewed interest is often accompanied by an abandonment of any concrete political perspective Critical philosophies are flourishing and proliferating but folded into the academic terrain they often remain disconnected from the global issues associated with the present crisis of capitalism contributing in turn to the fragmentation of the resistances that are opposed to it Instead of locking the perspective of emancipation into the registers of utopia or relegating it to the side of an empty populism Isabelle Garo studies in this book the conditions of a contemporary revival of the alternative as a collective construction anchored in real aspirations and struggles and inseparable from a rethinking of the theoretical work By addressing the impasses faced by many of the most fashionable radical theorists Badiou Laclau the theorists of the commons and revisiting them in relation to Marx and Gramsci also allows us to re read the latter from the point of view of contemporary questions of the state and the party of work and property of conflict and hegemony Thus to rethink strategy is above all to re explore the question of mediations whether they be forms of organisation or existing mobilisations as sites par excellence of political invention **Big Farms Make Big Flu** Rob Wallace, 2016-06-30 The first collection to explore infectious disease agriculture economics and the nature of science together Thanks to breakthroughs in production and food science agribusiness has been able to devise new ways to grow more food and get it more places more quickly There is no shortage of news items on hundreds of thousands of hybrid poultry each animal genetically identical to the next packed together in megabarns grown out in a matter of months then slaughtered processed and shipped to the other side of the globe Less well known are the deadly pathogens mutating in and emerging out of these specialized agro environments In fact many of the most dangerous new diseases in humans can be traced back to such food systems among them Campylobacter Nipah virus Q fever hepatitis E and a variety of novel influenza variants Agribusiness has known for decades that packing thousands of birds or livestock together results in a monoculture that selects for such disease But market economics doesn't punish the companies for growing Big Flu it punishes animals the environment

consumers and contract farmers. Alongside growing profits, diseases are permitted to emerge, evolve and spread with little check. That is what evolutionary biologist Rob Wallace writes in *Big Farms Make Big Flu*, a collection of dispatches by turns harrowing and thought provoking. Wallace tracks the ways influenza and other pathogens emerge from an agriculture controlled by multinational corporations. Wallace details with a precise and radical wit the latest in the science of agricultural epidemiology while at the same time juxtaposing ghastly phenomena such as attempts at producing featherless chickens, microbial time travel and neoliberal Ebola. Wallace also offers sensible alternatives to lethal agribusiness. Some such as farming cooperatives, integrated pathogen management and mixed crop-livestock systems are already in practice off the agribusiness grid. While many books cover facets of food or outbreaks, Wallace's collection appears the first to explore infectious disease, agriculture, economics and the nature of science together. *Big Farms Make Big Flu* integrates the political economies of disease and science to derive a new understanding of the evolution of infections. Highly capitalized agriculture may be farming pathogens as much as chickens or corn.

Rethinking Revolution Leo Panitch, Greg Albo, 2016-12. One hundred years ago, October 1917 galvanized leftists and oppressed peoples around the globe and became the lodestar for 20th century politics. Today the left needs to reckon with this legacy and transcend it. Social change as it was understood in the 20th century appears now to be as impossible as revolution, leaving the left to rethink the relationship between capitalist crises as well as the conceptual tension between revolution and reform. Populated by an array of passionate thinkers and thoughtful activists, *Rethinking Revolution* reappraises the historical effects of the Russian revolution, positive and negative on political, intellectual and cultural life and looks at consequent revolutions after 1917. Change needs to be understood in relation to the distinct trajectories of radical politics in different regions. But the main purpose of this Socialist Register edition, one century after Red October, is to look forward to what might happen next. Acclaimed authors interrogate and explore compelling issues including: Greg Albo, New socialist strategies or detours; Jodi Dean, Are the multitudes communing? Revolutionary agency and political forms today; Adolph Reed, Are racial minorities revolutionary agents? Zillah Eisenstein, Revolutionary feminisms today; Nina Power, Accelerated technology, decelerated revolution; David Schwartzman, Beyond global warming: Is solar communism possible? Andrea Malm, Revolution and counter-revolution in an era of climate change.

Les grammaires de la contestation Irène Pereira, 2010. R publicain de gauche, socialiste postmoderne, l'auteure présente les grands courants politiques de la gauche de la gauche française en s'inspirant du travail de Luc Boltanski. Elle tente de mettre en évidence les ressorts qui expliquent les différences entre les divers courants et familles politiques et les passions qui les animent.
