

Solve each equation. Simplify fully. Show your work!

1.  $9 + 4x = -59$

2.  $\frac{10x-5}{5} = -4$

3.  $\frac{3}{4}x + \frac{3}{4} = \frac{33}{32}$

4.  $6x - 5 = 7 - 9x$

5.  $6x - 5 = -3(2x + 1)$

6.  $\frac{3}{2}(4x - 20) + 5 = -2x + 5(x - 2)$

7. Each side of the equation,  $\frac{3}{4} - \frac{3}{4}x = 3$ , is graphed on the calculator. Based on this graph, what is the solution of the equation?

8. Justin and three friends went golfing. Two of the friends rented clubs for \$6 each and two had their own clubs. The total cost of the rented clubs and the green fees (the cost to play a round of golf) for each person was \$76. What was the cost of the green fees for each person? Let  $x$  represent the cost of the green fees for each person, write an equation, and solve the problem.

confidence their understanding and appreciation of math and their basic skills by presenting an extremely user friendly text that models a framework in which students can succeed. Unfortunately students who place into developmental math courses often struggle with math anxiety due to bad experiences in past math courses. Developmental math students often have never developed nor applied a study system in mathematics. To address these needs the authors have framed three goals for Elementary Algebra 1: reduce math anxiety, 2: teach for understanding, and 3: foster critical thinking and enthusiasm. The authors writing style is extremely student friendly. They talk to students in their own language and walk them through the concepts explaining not only how to do the math but also why it works and where it comes from rather than using the monkey see monkey do approach that some books take. Elementary Algebra with Early Systems of Equations as the title implies places the topic of Systems of Equations early in the text in Chapter 5. This organization is ideal for those instructors who prefer to teach systems of equations immediately following the chapter on graphing and the chapters prior to polynomials and factoring. For those who prefer to teach the topic later Elementary Algebra by the same author team places Systems of Equations in Chapter 8. Foundations of Algebra, Solving Linear Equations and Inequalities, Problem Solving, Graphing Linear Equations and Inequalities, Systems of Equations, Polynomials, Factoring Rational Expressions and Equations, Roots and Radicals, Quadratic Equations. For all readers interested in elementary algebra **College Algebra** Roy David Gustafson, Peter D. Frisk, 1993. Clear and straightforward College Algebra Fifth Edition preserves the integrity of mathematics yet does not discourage students with material that is confusing or too rigorous. Students with only high school algebra preparation can feel challenged and yet succeed with Gustafson and Frisk's practice problems and drills. Students quickly learn to master difficult problems which previously left them frustrated and develop the skills they'll need in future courses and everyday life. As the text progresses the mathematical language grows more mature, examples become less structured and exercises are more varied in their scope. By the end of the course students are able to move on their own beyond the course with a firm and usable grasp of mathematics. Problem sets range from drill and practice to others that will challenge even the best students. In order to ensure the accuracy of the text each author and a problem checker have worked every exercise **El-Hi Textbooks & Serials in Print, 2005**, 2005 **Apple Library Users Group Newsletter**, 1991
