An Introduction to Internet Governance Dr Jovan Kurbalija, 2016-11-08 Although Internet governance deals with the core of the digital world governance cannot be handled with the digital binary logic of the true or false or good or bad. Written in a clear and accessible way, supplemented with figures and illustrations, it focuses on the technical, security, legal, economic, development, sociocultural and human rights aspects of Internet governance. The text and approaches presented in the book have been used by DiploFoundation and many universities as a basis for training courses and capacity development programmes on Internet governance.

Governing Digital Public Infrastructure Stergios Aidinlis, 2025-10-15 This book explores how digital public infrastructures (DPI) should be governed in the public interest, harnessing their potential to drive innovation, inclusion and societal progress in the age of supercomputers and generative AI. DPI, from hardware and software to data and networks, are becoming increasingly critical to our economy, society and daily lives. As the AI revolution unfolds, the governance of these infrastructures is coming under scrutiny, with questions arising about how to balance innovation, access and the public interest. Examining the potential for DPI to empower citizen entrepreneurs, researchers, small businesses and the public sector, the book analyses the legal frameworks governing DPI access. Covering key areas such as AI law, data protection, IP law and competition law, the book emphasizes the need for inclusive and participatory governance models that prioritize transparency, accountability and the public good. It offers actionable recommendations for policymakers, businesses, civil society and researchers to collaborate in shaping the future of DPI governance. The book will be of interest to researchers in the field of digital law, digital governance and public law.
