Advanced Methods For Trending Ai Tools 2025:

Advanced Methods, Equipment and Platforms in Precision Field Crops Protection, volume II Jun Ni, Peter Yuen, Jingcheng Zhang, Ning Yang, 2025-11-05 Diseases pests and weeds have severely affected the production of crops. Traditional agriculture solves the above problems by large scale chemical spraying but excessive pesticides can also seriously affect the growth of crops and pollute the environment. Therefore it is necessary to use modern technologies to protect field crops accurately. Collect and analyze the characteristics and location information of diseases pests and weeds as early as possible with equipment and methods and use various platforms to complete the precise protection of field crops. This Research Topic welcomes submissions that address precision crop protection research and demonstrate how smart control strategies, sensor technology and operational platforms can be integrated into actual crop protection. We welcome submissions of original research articles, reviews and methods including but not limited to research on the following sub themes: 1 Real time monitoring and detection sensors for diseases pests and weeds 2 Intelligent crop protection methods based on artificial intelligence 3 Phenotypic parameter analysis of weeds and affected crops 4 Precision variable rate equipment and system for crop protection 5 Digital twin models, novel IoT technologies and cloud platform for crop protection 6 Advances, innovations and new trends in modern technologies for crop protection and development. [Selected Papers from the International Conference on Artificial Intelligence](#) Ali Othman Albaji, 2026-01-01 The First International Conference on Generative AI: Current Research, Industry Trends and Innovations (FICAI2025) proceedings will provide a comprehensive collection of the latest research and developments in the field of artificial intelligence with a particular focus on AI-Generative AI. The proceedings will encompass a wide range of topics including machine learning, ethical AI and practical applications in sectors such as healthcare, engineering and cybersecurity. This collection aims to document the significant contributions of academic and industry researchers who are driving the advancement of AI technologies. Each paper presents new methodologies, theoretical frameworks or practical implementations of AI systems designed to solve real world problems. With a global lineup of authors and contributors, the FICAI2025 proceedings will also highlight case studies and the latest trends from across industries, offering valuable insights for both AI researchers and professionals in the field. [Shaping Inclusive Educational Policies and Practices With Generative AI](#) Durak, Gürhan, Çankaya, Serkan, 2025-12-24 As generative AI reshapes the educational landscape, it presents a unique opportunity to design more inclusive policies and practices that address the diverse needs of learners. By using AI's abilities to personalize content and break down linguistic and accessibility barriers, educators and policymakers can create environments that are more equitable, responsive and dynamic. The integration of intelligent technology also requires ethical considerations and an organizational commitment to inclusivity. Using generative AI can be thoughtfully leveraged to shape educational systems that empower every student regardless of background or ability and foster a more just and inclusive future for learning.
