E? What is Ecology?

Ecology is the scientific study of interactions among organisms and between organisms and their physical environment.

Biosphere: consists of all life on Earth and all parts of the Earth in which life exists, including land, water, and the atmosphere.

E? What are biotic and abiotic factors?

The biological influences on organisms are called **biotic factors**. The physical components of an ecosystem are called **abiotic factors**.

Biotic Factors: any living part of the environment with which an organism might interact, including animals, plants, mushrooms, and bacteria.

Abiotic Factors: any nonliving part of the environment, such as sunlight, heat, precipitation, humidity, wind or water currents, soil type, and so on.

BIOTIC components	ABIOBITIC components
Food availability (including other organisms like fish, frogs and invertebrates)	Temperature (if the lizard warms up sufficiently important as alligators are cold-blooded)
Competition (with snapping turtles and raccoons for food and other resources for space/food/mates)	Climate (rainfall, humidity, wind... will affect the gator's activity)
Diseases (caused by bacteria, viruses or fungi)	Sunlight (intensity as well as length of day/night)
Parasites (such as fleas/mosquitos)	Oxygen availability (they need it for respiration)
Plants (e.g. leafy cypress, evergreen gum, my palmetto, poison ivy, poison ivy and mustard, live oaks, magnolia, mulberries, albatross, CCW and gopher tortoise)	pH and salinity (could affect the drinking water supply, also indirectly in terms of food availability and plant activity)

7th Grade Florida FAS Test Prep Mark

Shannon, 2018-01-17 This test prep is good for kids who are on the fence and having trouble passing or need to increase their margin. These kids will often say I DON T KNOW WHERE TO START when explaining their confusion. This book address that problem with three approaches. 1 In contrast with the other study guides that use random questions in their practice exams this book collated the questions into chapters based on the logic to solve them. The 7th grade book is divided into nine chapters. They are Logic, Arithmetic, Geometry, Fractions, Reading, Graphs and tables, Measurements including a ruler, basic statistics, order of operations, and Algebra. This book teaches basics then goes into practice exams with word problems. Once the student is proficient with the questions organized into chapters then they are ready for random questions. 2 This study guide has thousands of practice problems. I have placed over 3100 videos on YouTube showing you how to work the problems. 3 I reviewed several years of past exams and placed enfaces on the easiest and most common questions. Mastering these questions should yield a 75% to 80%. If a student is already achieving this percentage the other guides or web site with random questions and covering all material might be best. A book might be better for your student than the web sites for two reasons. 1 The more common and easiest questions are using a ruler to measure. The web designers don t know the size of your computer screen and can t determine if the student has measured correctly. We can get a high percentage of these problems easily. 2 When studying on a computer there are too many websites with the answers. With a book parents can have greater assurance the work is being done. This book is developed by a trained professional out of concern. It is not the product of a large publishing house. It is the results of one person who wants to help. Best Regards, Mark Shannon
