book is a comprehensive collection of chapters focusing on the core areas of computing and their further applications in the real world. Each chapter is a paper presented at the Computing Conference 2021 held on 15-16 July 2021. Computing 2021 attracted a total of 638 submissions which underwent a double blind peer review process. Of those 638 submissions 235 submissions have been selected to be included in this book. The goal of this conference is to give a platform to researchers with fundamental contributions and to be a premier venue for academic and industry practitioners to share new ideas and development experiences. We hope that readers find this volume interesting and valuable as it provides the state of the art intelligent methods and techniques for solving real world problems. We also expect that the conference and its publications is a trigger for further related research and technology improvements in this important subject.

**The Technical Analysis Course** Thomas A. Meyers, 1994. Presented in a workbook format, The Technical Analysis Course shows how to use the tools and strategies of technical analysis to uncover profitable opportunities in both the futures and stock markets. Complete with lessons, quizzes, charts, and examples, topics include The basics of technical analysis, How to read price charts, Moving averages, oscillators, and stochastics, Japanese candlesticks, Point and figure charting, Genetic Algorithms and Genetic Programming in Computational Finance Shu-Heng Chen, 2012-12-06. After a decade of development, genetic algorithms and genetic programming have become a widely accepted toolkit for computational finance. Genetic Algorithms and Genetic Programming in Computational Finance is a pioneering volume devoted entirely to a systematic and comprehensive review of this subject. Chapters cover various areas of computational finance including financial forecasting, trading strategies, development, cash flow management, option pricing, portfolio management, volatility modeling, arbitraging, and agent based simulations of artificial stock markets. Two tutorial chapters are also included to help readers quickly grasp the essence of these tools. Finally, a menu driven software program, Simple GP, accompanies the volume which will enable readers without a strong programming background to gain hands on experience in dealing with much of the technical material introduced in this work.

Proceedings of the 3rd International Conference on Internet, Education and Information Technology (IEIT 2023) Dhananjay Kumar, Pavel Loskot, Qingliang Chen, 2023-09-01. This is an open access book. The 3rd International Conference on Internet, Education and Information Technology (IEIT 2023) was held on April 28-30, 2023 at the Xiamen, China. With the development of science and technology, information technology and information resources should be actively developed and fully applied in all fields of education and teaching so as to promote the modernization of education and cultivate talents to meet the needs of society. From the technical point of view, the basic characteristics of educational informatization are digitalization, networking, intelligentization, and multi media. From the perspective of education, the basic characteristics of educational information are openness, sharing, interaction, and cooperation. With the advantage of the network, it can provide students with a large amount of information and knowledge by combining different knowledge and information from various aspects in a high frequency. Therefore, we have intensified efforts to reform the traditional teaching

methods and set up a new teaching concept from the interaction between teachers and students in the past to the sharing between students In short it forms a sharing learning mode For all students strive to achieve students learning independence initiative and creativity To sum up we will provide a quick exchange platform between education and information technology so that more scholars in related fields can share and exchange new ideas The 3rd International Conference on Internet Education and Information Technology IEIT 2023 was held on April 28 30 2023 in Xiamen China IEIT 2023 is to bring together innovative academics and industrial experts in the field of Internet Education and Information Technology to a common forum The primary goal of the conference is to promote research and developmental activities in Internet Education and Information Technology and another goal is to promote scientific information interchange between researchers developers engineers students and practitioners working all around the world The conference will be held every year to make it an ideal platform for people to share views and experiences in international conference on Internet Education and Information Technology and related areas *International Conference on Cognitive based Information Processing and Applications (CIPA 2021)* Bernard J.
