Mppt Charge Controller Using Avr:

Soft Computing for Problem Solving Kedar Nath Das, Jagdish Chand Bansal, Kusum Deep, Atulya K. Nagar, Ponnambalam Pathipooranam, Rani Chinnappa Naidu, 2019-11-27 This two volume book presents the outcomes of the 8th International Conference on Soft Computing for Problem Solving SocProS 2018 This conference was a joint technical collaboration between the Soft Computing Research Society Liverpool Hope University UK and Vellore Institute of Technology India and brought together researchers engineers and practitioners to discuss thought provoking developments and challenges in order to select potential future directions The book highlights the latest advances and innovations in the interdisciplinary areas of soft computing including original research papers on algorithms artificial immune systems artificial neural networks genetic algorithms genetic programming and particle swarm optimization and applications control systems data mining and clustering finance weather forecasting game theory business and forecasting applications It offers a valuable resource for both young and experienced researchers dealing with complex and intricate real world problems that are difficult to solve using traditional methods

AI and Learning Systems Konstantinos Kyprianidis, Erik Dahlquist, 2021-02-17 Over the last few years interest in the industrial applications of AI and learning systems has surged This book covers the recent developments and provides a broad perspective of the key challenges that characterize the field of Industry 4.0 with a focus on applications of AI The target audience for this book includes engineers involved in automation system design operational planning and decision support Computer science practitioners and industrial automation platform developers will also benefit from the timely and accurate information provided in this work The book is organized into two main sections comprising 12 chapters overall Digital Platforms and Learning Systems Industrial Applications of AI

Advanced Frequency Regulation Strategies in Renewable-Dominated Power Systems Sandeep Dhundhara, Yogendra Arya, Ramesh C. Bansal, 2023-09-01 Advanced Frequency Regulation Strategies in Renewable Dominated Modern Power Systems discusses advanced control strategies positioned to attain stable and reliable electric power operation in highly renewable modern grids These strategies are increasingly valuable components of the practitioner technical toolbox and are essential to maintain frequency and voltage regulations assert power quality standards and ensure overall grid stability This book focuses on the rapid integration of renewable based generating units in power systems highlighting state of the art technologies and emerging topics pertaining to load frequency control robust control strategies and energy storage systems Chapters are accompanied by case studies drawn from modern international practice Disseminates novel control strategies for the reliable and robust control of renewable generating units Discusses implementation using case studies that address multiple frequency control applications across integrated modern power systems Accompanied by simulation models in MATLAB that are built to emphasize practical usage and address real world problems

A Practical Guide for Advanced Methods in Solar Photovoltaic Systems Adel Mellit, Mohamed Benghaneim, 2020-05-27 The present book focuses on recent advances methods

and applications in photovoltaic PV systems The book is divided into two parts the first part deals with some theoretical simulation and experiments on solar cells including efficiency improvement new materials and behavior performances While the second part of the book devoted mainly on the application of advanced methods in PV systems including advanced control FPGA implementation output power forecasting based artificial intelligence technique AI high PV penetration reconfigurable PV architectures and fault detection and diagnosis based AI The authors of the book trying to show to readers more details about some theoretical methods and applications in solar cells and PV systems eg advanced algorithms for control optimization power forecasting monitoring and fault diagnosis methods The applications are mainly carried out in different laboratories and location around the world as projects Algeria KSA Turkey Morocco Italy and France The book will be addressed to scientists academics researchers and PhD students working in this topic The book will help readers to understand some applications including control forecasting monitoring fault diagnosis of photovoltaic plants as well as in solar cells such as behavior performances and efficiency improvement It could be also be used as a reference and help industry sectors interested by prototype development

Recent Developments in Electrical and Electronics Engineering Poonam Singhal,Sakshi Kalra,Bhim Singh,R. C. Bansal,2023-04-28 This book contains cutting edge research content presented by researchers engineers developers and practitioners from academia and industry at the International Conference on Recent Developments in Electrical and Electronics Engineering ICRDEEE 2022 The materials in the book include theory and applications for different areas of Electrical and Electronics Engineering The topics covered include power systems and protection energy electric vehicles smart grid semiconductor technologies electrical machines and drives control systems with artificial intelligence etc The content is useful for researchers professionals and academicians in understanding current research trends findings and future scope of research in electrical and electronics engineering models

Recent Trends in Intensive Computing M. Rajesh,K. Vengatesan,M. Gnanasekar,_ Sitharthan R,A.B. Pawar,P.N. Kalvadekar,P. Saiprasad,2021-12-15 In a world where computer science is now an essential element in all of our lives a new opportunity to disseminate the latest research and trends is always welcome This book presents the proceedings of the first International Conference on Recent Trends in Computing ICRTC 2021 which was held as a virtual event on 21 22 May 2021 at Sanjivani College of Engineering Kopargaon India due to the restrictions of the COVID 19 pandemic This online conference aimed at facilitating academic exchange among researchers enabled experts and scholars around from around the globe to gather for the discussion of the latest advanced research in the field despite the extensive travel restrictions still in place The book contains 134 papers selected from 329 submitted papers after a rigorous peer review process and topics covered include advanced computing networking informatics security and privacy and other related fields The book will be of interest to all those eager to find the latest trends and most recent developments in computer science
