

Crosswalk

Highly visible crosswalk markings are combined with colored and textured asphalt.

Rain Garden

This landscape feature is planted with native plants and is used to filter pollutants from storm water runoff. Provides seating to accommodate street activities.

Bike Lane

Provides designated striping, signage, and colored paving. This portion of the street delineates the zone assigned to bicycles while visually and physically narrowing the vehicular zone.

Bike Parking

The dedicated and unobstructed bike parking zone helps keep bicycles off the sidewalk. Bollards are used to clearly delineate the space and provide protection from parking motorists. Additional bike racks may be provided at select retail destinations.

Parallel Parking

This space effectively achieves compression by physically narrowing the roadway and using decorative paving materials to visually expand the pedestrian realm.

Built-out

This sidewalk extension improves pedestrian crossings by reducing the pedestrian crossing distance and visually and physically narrowing the roadway. This built-out incorporates ADA compliant ramps and bollard protection.

Urban Design Puneet Sharma, 2025-07-21 Urban design is the art of creating spaces which are public in nature and intended to be used by all Derived from the idea of civic design at city level presently urban design is considered as the most recognized way to deal with urban complexities This book contains a study of basics of urban design derived from various literature studies It discusses the viewpoint of famous urban designers and showcases the methodology followed for urban design investigation at city level The idea behind this work is not only to showcase what exists but also to share strategies and ways for future developments The overall essence of this book is to provide a comprehensive idea to students

about the need and vocabulary of urban design The proposed volume is divided into three parts while creating and evolving the concept of urban design The first part describes the intelligence of various aspects of the subject The influential areas and approach towards sustainable urban design practices have been explored and illustrated in this section The second part discusses the literature contribution of some of the renowned urban designers The third section of this book is all about the principles and theories of urban design **The Role of Graphics as an Element of Urban Design** Scott W. Architecture and Urban Design as Influences on the Communication of Place and Experience in Graphic Design Candice Reese, 2009 Most architects and urban designers are challenged to design schemas and structures to create a particular experience and sense of place It is through the manipulation and design of actual three dimensional spaces that they are able to achieve this How then is a three dimensional experience of a place conveyed in two dimensions Distilling an actual experience into a graphic solution can be exceptionally challenging but graphic designers may need to accomplish this for particular clients Examining the ideologies and methodologies of architecture and urban design may offer new and thoughtful approaches for graphic interpretations of three dimensional experiences This thesis first examines how a sense of place is created by architecture and urban design solutions through careful considerations related to culture history community and environment The realm of actual places exists in three dimensions rather than two dimensions However there are many instances when it is beneficial to distill three dimensional experiences into two dimensional formats i e tourism materials cookbooks school catalogues to help visually and verbally summarize and communicate an environment or experience to an audience This study draws parallels to the field of graphic design from architecture and urban design to establish ways in which these goals can be effectively communicated through a graphic design solution Abstract
