## **Humor To Remember English Edition:**

The Dubbing Translation of Humorous Audiovisual Texts Pietro Luigi Iaia, 2015-09-04 This book provides a theoretical and practical framework for researchers and practitioners who focus on the construction interpretation and retextualisation of audiovisual texts It defines translation as a communicative and interpretative process with translators seen as cross cultural mediators who make the denotative semantic and connotative pragmatic dimensions of source scripts accessible to target receivers prompting equivalent perlocutionary effects while still respecting the original illocutionary force While existing research on audiovisual translation generally adopts a product based perspective examining the lexico semantic and syntactic features of source and target versions this book proposes an Interactive Model in order to explore what happens in the translators minds as well as the influence of the interaction between the linguistic and extralinguistic dimensions in the construction and interpretation of audiovisual texts The application of this Model to the analysis of a corpus of humorous films TV series and video games foregrounds the integration between the analysis of the source text features and the knowledge of the target linguacultural backgrounds in the creation of pragmalinguistic equivalent scripts At the same time this book also provides valuable insights into the audience s reception of these translations by submitting close ended and open ended questionnaires to subjects representing empirical receivers thus helping to evaluate the degree of linguistic and functional equivalence of target versions

**Script-Based Semantics** Salvatore Attardo, 2020-02-24 The book contains essays in honor of Victor Raskin The contributions are all directly related to some of the major areas of work in which Raskin s scholarship has spanned for decades The obvious connecting idea is the encyclopedic script based foundation of lexical meaning which informs his pioneering work in semantics in the 1970s and 1980s The first part of the book collects articles directly concerned with script based semantics which examine both the theoretical and methodological premises of the idea and its applications Script based semantics is the foundation of both Raskin s ground breaking work in humor research addressed by the articles in part 2 and in Ontological semantics addressed in part 3 the most recent development of script based semantics The fourth part is dedicated to a less known but equally important strand of Raskin s research the applications of linguistics to other fields including writing lexicography and professional applications e g tourism Overall the book provides and up to date in depth discussion of an influential strand of the discussion on semantics and its most recent developments and influence on other seemingly unrelated fields such as Cognitive Linguistics
