**Law and Regulation of Mobile Payment Systems** Joy Malala, 2017-11-28 Over the last ten years mobile payment systems have revolutionised banking in some countries in Africa In Kenya the introduction of M Pesa a new financial services model has transformed the banking and financial services industry Giving the unbanked majority access to the financial services market it has attracted over 18 million subscribers which is remarkable given that fewer than 4 million people in Kenya have bank accounts This book addresses the legal and regulatory issues arising out of the introduction of M Pesa in Kenya and its drive towards financial inclusion It considers the interaction between regulation and technological innovation with a particular focus on the regulatory tools institutional arrangements and government decisional processes through the examination as a whole of its regulatory capacity This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing the legal and regulatory issues presented by mobile payments The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya

Balakrishnan, 2019-11-01 Economic corridors ambitious infrastructural development projects that newly liberalizing countries  
in Asia and Africa are undertaking are dramatically redefining the shape of urbanization Spanning multiple cities and  
croplands these corridors connect metropolises via high speed superhighways in an effort to make certain strategic regions  
attractive destinations for private investment As policy makers search for decentralized and market oriented means for the  
transfer of land from agrarian constituencies to infrastructural promoters and urban developers the reallocation of property  
control is erupting into volatile land based social conflicts In Shareholder Cities Sai Balakrishnan argues that some of India's  
most decisive conflicts over its urban future will unfold in the regions along the new economic corridors where electorally  
strong agrarian propertied classes directly encounter financially powerful incoming urban firms Balakrishnan focuses on the  
first economic corridor the Mumbai Pune Expressway and the construction of three new cities along it The book derives its  
title from a current mode of resolving agrarian urban conflicts in which agrarian landowners are being transformed into  
shareholders in the corridor cities and the distributional implications of these new land transformations Shifting the focus of  
the study of India's contemporary urbanization away from megacities to these in between corridor regions Balakrishnan  
explores the production of uneven urban development that unsettles older histories of agrarian capitalism and the emergence  
of agrarian propertied classes as protagonists in the making of urban real estate markets Shareholder Cities highlights the  
possibilities for a democratic politics of inclusion in which agrarian urban encounters can create opportunities for previously  
excluded groups to stake new claims for themselves in the corridor regions      *Comprehensive Geographic Information
