A Power Primer - An Introduction to the Internal Combustion Engine Public Relations Staff GENERAL MOTORS, 2013-12-19 This might be called a sketch book of engines Pictures have been substituted for words wherever possible and the technical language has been held to a minimum Most people today have at least a nodding acquaintance with the internal combustion engine To the great majority it is what makes an automobile go But to others it may be the motive power for a tractor or truck a cruiser or a tug boat a fighter plane or a transport It may furnish power and light to an isolated farm to a saw mill in the woods or to an entire city For today the internal combustion engine has invaded all fields from the bottom of the ocean to the limits of the heavens We will demonstrate that they all are based on three things AIR FUEL and IGNITION We need those three things to make any internal combustion engine run We have rather arbitrarily classified them in three groups automobile aircraft and Diesel 1955 Public Relations Staff GENERAL MOTORS
