For students submitting the Common Application, we require two additional short essays. Applicants will choose to answer two of the following three questions in responses of 200 to 250 words:

- Imagine having a 1 a.m. debate/discussion with your peers in college about an issue you care about. What is that issue, and what is the discussion?
- Share your favorite quote, and tell us what it means to you. The quote can be from an author, leader, musical artist, family member or other source—famous or not. (The quote does not count toward your word limit.)
- We want to understand you better! Tell us about a skill you have (useless or useful) and what it says about you.

What Colleges Don't Tell You (And Other Parents Don't Want You to Know) Elizabeth Wissner-Gross, 2007-07-31 A sought after packager of high school students shares 272 secrets to help parents get their kids into the top schools. Targeting the savvy parents of today's college-bound teenagers who seek to gain a proven edge in the college admissions process, this book reveals 272 little-known secrets to help parents get their kids into the school of their dreams. Did you know a child's guidance counselor can help reverse a deferral? A parent can help get a child off a waiting list. There is a way for students to back out of Early Decision once they've been accepted. Based on the controversial insider information Elizabeth Wissner Gross has gleaned from working as a highly successful packager of high school students and from interviews with heads of admission at the nation's top colleges, this book empowers parents by decoding the admissions process.

Animal Biotechnology Ashish S. Verma, Anchal Singh, 2013-11-04 Animal Biotechnology introduces applications of animal biotechnology and implications for human health and welfare. It begins with an introduction to animal cell cultures and genome sequencing analysis and provides readers with a review of available cell and molecular tools. Topics here include the use of transgenic animal models, tissue engineering, nanobiotechnology and proteomics. The book then delivers in-depth examples of applications in human health and prospects for the future, including cytogenetics and molecular genetics, xenografts and treatment of HIV and cancers. All this is complemented by a discussion of the ethical and safety considerations in the field. Animal biotechnology is a broad field encompassing the polarities of fundamental and applied research, including molecular modeling, gene manipulation, development of diagnostics and vaccines, and manipulation of tissue. Given the tools that are currently available and the translational potential for these studies, animal biotechnology has become one of the most essential subjects for those studying life sciences. Highlights the latest biomedical applications of genetically modified and cloned animals, with a focus on cancer and infectious diseases. Provides firsthand accounts of the use of biotechnology tools, including molecular markers, stem cells and tissue engineering.
