How to Write a Scientific Paper Jari Saramäki, 2018-11-03 What if writing scientific papers was faster, easier, and a bit less painful? This book provides a step-by-step, top-down approach that makes it easier to turn your hard-won results into research papers that your fellow scientists want to read and cite. I just wrote a rough first draft of a paper during a 3-hour flight, and if it wasn't for these teachings, this would have taken me days, if not weeks. Talayeh Aledavood, James S. McDonnell Postdoctoral Fellow, University of Helsinki. The book's systematic approach builds on what I've learned through coauthoring close to 100 research papers with students. You'll learn how to outline your paper from top to bottom, how to develop your story, and how to think about what to write before you write it. You'll also learn how to deal with many issues that writers of science commonly face, from the fear of the blank page to dealing with critical reviews. Here's what you get: A complete step-by-step plan for writing a scientific paper from choosing which results to include to wrapping up the paper in the Discussion section.
