### osmosis and water potential

1. Available for knowledge basic lab equipment
2. Remember that Lab Safety Rules must be prepared to first manipulations and solutions for every experiment.
3. Remember general lab rules: no eating and drinking.
4. Don't use long-sleeved coats or the laboratory lab coat.

### Problems: osmosis, turgor pressure, and water potential

1. What is the difference between osmosis and water potential?

**Osmosis is the movement of water across a semipermeable membrane from a region of high water potential to a region of low water potential.**

2. What is a water potential gradient and how is it related to osmosis?

**The water potential gradient is the difference in water potential between two regions. It is the driving force for osmosis, and it is related to the concentration of solutes in the solution.**

3. What is the relationship between water potential and osmosis?
4. What is the relationship between water potential and turgor pressure?
5. What is the relationship between water potential and the cell cycle?
6. What is the relationship between water potential and the cell wall?

### cell cycle and water potential

1. Remember that the cell cycle is the process by which a cell divides to produce two daughter cells. It is a highly regulated process that involves the coordination of many different factors, including the availability of water and the presence of growth factors.
