

# **Writing a Qualitative Research Paper: do's and don'ts**

In your academic years, especially when you are in your college, you are required to write research papers on different subjects. However, in some colleges, in order to complete your degree, you are required to submit a final research project.

As an [essay writer](#), you might have a lot of essays in your schools and college, so you must know how the academic rules and conventions are followed to achieve your goal. I know that writing a research paper is not easy and it requires a lot of effort, strength, and determination. But let me tell you one thing that when you are well aware of the things regarding conducting and writing a research paper, you can easily write a good research paper without any inconvenience.

When you write a research paper, you have to follow certain norms and rules of writing research and a paper as well. For example, we have different types of research through which you reach your goal and write a paper considering all the requirements to the type you have selected for your paper.

Qualitative and quantitative research differs in their methods. Basically, these two are the methods with which you conduct a research paper. Qualitative research is descriptive and answers the question in the form of description, whereas quantitative research is in statistics where you conduct the research in order to find the numerical answers to the questions.

When I [write my essay](#), the first thing I consider is what type of research I am doing and what needs to be done and what I should avoid. Qualitative and quantitative are the two main types of research that are usually conducted.

So, in other words, we can say that qualitative research deals with words and their meaning, whereas quantitative research deals with numbers and statistics. No matter what type you have selected for your research, you have to follow the rules.
