

Sample Market Research Report

I. Background

The Desert Shield/Desert Storm Museum commemorates those who served in the Persian Gulf on behalf of our country during Operation Desert Shield/Desert Storm. The museum houses many artifacts of the war and gifts of appreciation from the Saudi Arabian and Kuwaiti Governments. Upgraded security measures are required for the museum.

II. System Requirements

- Six rooms within the museum, each 20' × 20', permanently house the museum's displays. Each room requires 24-hours-a-day/seven-days-a-week video surveillance. An archived record of surveillance must be maintained of the video for the previous four weeks. The video system must be light-compensated for normal extremes of indoor lighting. The control and monitoring room is 8' × 8'.
- A walk-through metal detection system will be installed at the main entrance to the museum. The system must have indicators for power and alarm and a 12-digit key pad, which is hermetically sealed to resist dust and moisture. A humidity tolerance of 95% non-condensing is required, as is an operating temperature of 10°C to 55°C. There must be constant monitoring of each electronic system and an announcement of any major failure. The structure must conform to the structure around it. The detector must be weatherized.
- An uninterruptable power supply or other electrical backup system will be required to support the video and metal detection systems at full capacity for at least two hours.
