## Geography March Paper 2014:

**Geofinance between Political and Financial Geographies** Silvia Grandi, Christian Sellar, Juvaria Jafri, 2019-12-27 This edited collection explores the boundaries between political and financial geographies focusing on the linkages between the changing strategies, policies and institutions of the state. It also investigates banks and other financial institutions affected by both state policies and a globalizing financial system and the financial resources available to firms as well as households. In so doing the book highlights how an empirical focus on the semi periphery of the financial system may generate new perspectives on the entanglement between geo politics and finance.

**Handbook on Geographies of Technology** Barney Warf, 2017-02-24 This Handbook offers an insightful and comprehensive overview from a geographic perspective of the numerous and varied technologies that are shaping the contemporary world. It shows how geography and technology are intimately linked by examining the origins, growth and impacts of 27 different technologies and highlighting how they influence the structure and spatiality of society.

**Order and Conflict in Public Space** Mattias De Backer, Lucas Melgaço, Georgiana Varna, Francesca Menichelli, 2016-05-20 Which public and whose space? The understanding of public space as an arena where individuals can claim full use and access hides a reality of constant negotiation, conflict and surveillance. This collection uses case studies concerning the management, use and transgression of public space to invite reflection on the way in which everyday social interaction is framed and shaped by the physical environment and vice versa. International experts from fields including geography, criminology, sociology and urban studies come together to debate the concepts of order and conflict in public space. This book is divided into two parts: spaces of control and spaces of transgression. Section I focuses on formal and informal surveillance and the politics of control using case studies to compare strategies in spaces including Olympic cities, luxury skyscrapers, residential neighbourhoods and shopping malls. Section II focuses on transgressive or deviant behaviour in public spaces with case studies examining behaviour in nightlife districts, governance of homelessness, boy racer culture and abortion protests. The epilogue concludes the book with an exploration of possible future avenues for research on public space and a critical appraisal of the concept of public space itself. This interdisciplinary collection will be of interest to students, researchers and professionals in the areas of criminology, sociology, surveillance studies, human and social geography and urban studies and planning.

**The Routledge Handbook of Tourism in Asia** C. Michael Hall, Stephen J. Page, 2016-09-13 Asia is regarded as the fastest growing area for international and domestic tourism in the world today and over the next 20 years. Given the economic, social and environmental importance of tourism in the region there is a need for a comprehensive and readable overview of the critical debates and controversies in tourism in the region and the major factors that are affecting tourism development both now and in the foreseeable future. This Handbook provides a contemporary survey of the region and its continued growth and development as a key destination and generator of tourism which is marked by a high proportion of intra regional travel. The book is divided into five sections:

This first section provides an introduction to the region and context to the nationally focused chapters. The next three sections are then broadly based on the three UNWTO Asian regions: South East Asia, South and Central Asia and East and North East Asia, providing readers with a valuable snapshot of tourism at various scales and from various approaches and positions. The concluding section considers future prospects for tourism in Asia. The handbook is interdisciplinary in coverage and is also international in scope through its authorship and content. It presents a range of perspectives and understanding of the processes and forces that are shaping tourism in this fascinating and dynamic region that is one of the focal points of global tourism. This is essential reading for students, researchers and academics interested in tourism in the growth region of Asia now and in the future.

**Local and Regional Development** Andy Pike, Andrés Rodriguez-Pose, John Tomaney, 2016-07-15. Actors and institutions in localities and regions across the world are seeking prosperity and well-being amidst tumultuous and disruptive shifts and transitions generated by an increasingly globalised knowledge intensive capitalism. Global financial instability, volatility and crisis concerns about economic, social and ecological sustainability, climate change and resource shortages, new multi-actor and multi-level systems of government and governance, and a re-ordering of the international political economy. State, austerity and retrenchment and new and reformed approaches to intervention, policy and institutions for local and regional development. Local and Regional Development provides an accessible, critical and integrated examination of local and regional development theory, institutions and policy in this changing context. Amidst its rising importance, the book addresses the fundamental issues of what kind of local and regional development and for whom, its purposes, principles and values, frameworks of understanding, approaches and interventions, and integrated approaches to local and regional development throughout the world. The approach provides a theoretically informed critical analysis of contemporary local and regional development in an international and multi-disciplinary context, grounded in concrete empirical analysis from experiences in the global North and South. It concludes by identifying what might constitute holistic, inclusive, progressive and sustainable local and regional development and reflecting upon its limits and political renewal.

*Atlas of Knowledge* Katy Borner, 2015-03-20. The power of mapping principles for visualizing knowledge, illustrated by many stunning large-scale full-color maps. Maps of physical spaces locate us in the world and help us navigate unfamiliar routes. Maps of topical spaces help us visualize the extent and structure of our collective knowledge; they reveal bursts of activity, pathways of ideas and borders that beg to be crossed. This book, from the author of *Atlas of Science*, describes the power of topical maps, providing readers with principles for visualizing knowledge and offering as examples forty large-scale and more than 100 small-scale full-color maps. Today, data literacy is becoming as important as language literacy. Well-designed visualizations can rescue us from a sea of data, helping us to make sense of information, connect ideas and make better decisions in real time. In *Atlas of Knowledge*, leading visualization expert Katy Börner makes the case for a systems science approach to science and technology studies and explains different types and levels of analysis. Drawing on fifteen

years of teaching and tool development she introduces a theoretical framework meant to guide readers through user and task analysis data preparation analysis and visualization visualization deployment and the interpretation of science maps To exemplify the framework the Atlas features striking and enlightening new maps from the popular Places Spaces Mapping Science exhibit that range from Key Events in the Development of the Video Tape Recorder to Mobile Landscapes Location Data from Cell Phones for Urban Analysis to Literary Empires Mapping Temporal and Spatial Settings of Victorian Poetry to Seeing Standards A Visualization of the Metadata Universe She also discusses the possible effect of science maps on the practice of science

**Universities as Living Labs for Sustainable Development** Walter Leal Filho, Amanda Lange Salvia, Rudi W. Pretorius, Luciana Londero Brandli, Evangelos Manolas, Fatima Alves, Ulisses Azeiteiro, Judy Rogers, Chris Shiel, Arminda Do Paco, 2019-04-30 This book fills an important gap in the literature and presents contributions from scientists and researchers working in the field of sustainable development who have engaged in dynamic approaches to implementing sustainability in higher education It is widely known that universities are key players in terms of the implementation and further development of sustainability with some having the potential of acting as living labs in this rapidly growing field Yet there are virtually no publications that explore the living labs concept as it relates to sustainability and in an integrated manner The aims of this book which is an outcome of the 4th World Symposium on Sustainable Development at Universities WSSD U 2018 held in Malaysia in 2018 are as follows i to document the experiences of universities from all around the world in curriculum innovation research activities and practical projects as they relate to sustainable development at the university level ii to disseminate information ideas and experiences acquired in the execution of projects including successful initiatives and good practice iii to introduce and discuss methodological approaches and projects that seek to integrate the topic of sustainable development in the curricula of universities and iv to promote the scalability of existing and future models from universities as living labs for sustainable development The papers are innovative cross cutting and many reflect practice based experiences some of which may be replicable elsewhere Also this book prepared by the Inter University Sustainable Development Research Programme IUSDRP and the World Sustainable Development Research and Transfer Centre WSD RTC reinforces the role played by universities as living labs for sustainable development
