## **Memory A Very Short Introduction:**

**Memory: A Very Short Introduction** Jonathan K. Foster, 2009 Why can we sometimes remember events from our childhood as if they happened yesterday but not what we did last week How are memories stored in the brain and how does our memory change as we age What happens when our memory goes wrong and how easy is it for others to manipulate our memories This fascinating Very Short Introduction brings together the latest research in psychology and neuroscience to address these and many other important questions about the science of memory revealing how our memory works why we couldn't live without it and even how we may learn to remember more **BOOK JACKET** *Memory* Jonathan

Foster, 2026-01-22 This Very Short Introduction draws on the latest research in neuroscience and psychology to explore the science of memory It uses case studies anecdotes literature and philosophy to explain how memory works and why we can't live without it **Memory** Jonathan K. Foster, 2009 Jonathan K Foster brings together research in neuroscience and

psychology weaving in case studies anecdotes literature and philosophy to explore and explain the science of memory how it works and why we can't live without it Working Memory and Language in the Modular Mind John Truscott, 2022-06-16

The book explores two fundamental aspects of the human mind and their relation to one another The first is the way that information is put to use in the mind When we are doing a mental arithmetic problem for example how do we bring the relevant bits of information to mind and hold them there while carrying out the series of calculations This is working memory the subject of an enormous research literature in psychology neuroscience and a great many other disciplines Characterizing the working memory process is now a major part of efforts to understand the human mind How we characterize this process depends of course on how we characterize the human mind as a whole In particular is the mind made up of a number of distinct units each carrying out a specialized function There is considerable reason to say that it is and this modular view of the mind has become prominent in a great deal of academic work notably in cognitive neuroscience with important implications for our understanding of how working memory works But these implications have received surprisingly little consideration to this point The aim of the book is to explore this relation between working memory and modularity first in general terms and then using a specific modular view of the mind the Modular Cognition Framework The ideas are illustrated and further developed through an application to language and especially second language acquisition and use The

College Lecture Today Lee Trepanier, 2019-06-26 In an age of online education and educational philosophies like flipping the classroom does the lecture have any role in today's university Drawing from the humanities and social sciences and from a range of different types of schools The College Lecture Today makes the affirmative case for the lecture in the humanities and social and political sciences These essays explore how to lecture without sacrificing theoretical knowledge **Memory and Identity in the Syriac Cave of Treasures** Sergey Minov, 2020-12-07 In Memory and Identity in the Syriac Cave of Treasures Rewriting the Bible in Sasanian Iran Sergey Minov examines literary and socio cultural aspects of the Syriac

pseudepigraphic composition known as the Cave of Treasures which offers a peculiar version of the Christian history of salvation The book fills a lacuna in the history of Syriac Christian literary creativity by contextualising this unique work within the cultural and religious situation of Sasanian Mesopotamia towards the end of Late Antiquity The author analyses the Cave's content and message from the perspective of identity theory and memory studies while discussing its author's emphatically polemical stand vis vis Judaism the ambivalent way in which he deals with Iranian culture and the promotion in this work of a distinctively Syriac oriented vision of the biblical past

**Performing Memory** Luisa Passerini, Dieter

Reinisch, 2023-06-09 Through a post 1968 perspective on the past 50 years Performing Memory brings together case studies on new developments in the relationship between politics and visual representation including the histories of dance theatre political performance and cinema and investigates how they relate to the interlinked concepts of visibility corporeality and mobility Using a collective transdisciplinary attitude from within historical disciplines and looking across to artistic fields this volume demonstrates that memory is not merely a recollection of experience but an interactive process in which the body mobile and constrained is both a point of departure and reference

**Memory and Narrative Ethics** Jacob

Lothe, 2025-03-26 As the last survivors of the Holocaust pass away the challenge of maintaining and extending our knowledge of this critical historical event becomes increasingly urgent Without the firsthand testimonies of survivors our understanding of the Holocaust is at risk of becoming diluted or distorted The narratives that shape our collective memory whether through testimony fiction or film are essential in preserving the true horror and lessons of the Holocaust This fading firsthand knowledge could lead to a loss of the ethical and historical gravity of Nazi Germany's mass murder of around six million Jews Memory and Narrative Ethics presents an original approach that combines narrative studies memory studies narrative ethics narrative psychology and Holocaust studies to analyze how different forms of narrative preserve Holocaust memory Through the approach of narrative hermeneutics and taking into account his own perspective as a European born after the Second World War Jakob Lothe offers insightful analysis of testimonies non fiction films novels and film adaptations and demonstrates how these narratives constructively respond to the ethical challenge of remembering the Holocaust By understanding and utilizing these diverse narrative forms we can maintain a vivid ethical and comprehensive collective memory of the Holocaust This ensures that future generations grasp the historical significance and moral lessons of this atrocity even as direct survivor testimonies soon become scarce

**The God Susanoo and Korea in Japan's Cultural**

**Memory** David Weiss, 2022-01-13 This book discusses how ancient Japanese mythology was utilized during the colonial period to justify the annexation of Korea to Japan with special focus on the god Susanoo Described as an ambivalent figure and wanderer between the worlds Susanoo served as a foil to set off the sun goddess who played an important role in the modern construction of a Japanese national identity Susanoo inhabited a sinister otherworld which came to be associated with colonial Korea Imperialist ideologues were able to build on these interpretations of the Susanoo myth to depict Korea as

a dreary realm at the margin of the Japanese empire that made the imperial metropole shine all the more brightly At the same time Susanoo was identified as the ancestor of the Korean people Thus the colonial subjects were ideologically incorporated into the homogeneous Japanese family state The book situates Susanoo in Japan's cultural memory and shows how the deity while being repeatedly transformed in order to meet the religious and ideological needs of the day continued to symbolize the margin of Japan

*Thinking and Reasoning: A Very Short Introduction* Jonathan St B. T. Evans, 2017-09-21 Our extraordinary capacity to reason and solve problems sets us aside from other animals but our evolved thinking processes also leave us susceptible to bias and error The study of thinking and reasoning goes back to Aristotle and was one of the first topics to be studied when psychology separated from philosophy In this Very Short Introduction Jonathan Evans explores cognitive psychological approaches to understanding the nature of thinking and reasoning problem solving and decision making He shows how our problem solving capabilities are hugely dependent on also having the imagination to ask the right questions and the ability to see things from a completely new perspective Beginning by considering the approaches of the behaviourists and the Gestalt psychologists he moves on to modern explorations of thinking including hypothetical thinking conditionals deduction rationality and intuition Covering the role of past learning IQ and cognitive biases Evans also discusses the idea that there may be two different ways of thinking arising from our evolutionary history

*Race and Memory in Tony Morrison's "Recitatif"* Rüdiger Thomsen, 2021-11-25 Seminar paper from the year 2014 in the subject American Studies Literature grade 1.0 University of Constance Anglistik Amerikanistik course American Literature and Culture II language English abstract Against the standard focus on the questions of race in Tony Morrison's *Recitatif* this paper analyses how the short story features the four levels of memory as defined by Aleida Assmann individual social political and cultural African American author Toni Morrison mentions memory as a central theme of her work While Morrison's novels have been approached from this angle her only short story *Recitatif* has mostly been read as a comment on race relations and stereotypes This paper shifts focus from race towards individual and collective memory as vital elements of this story Still the issue of race can be integrated in the larger concept of collective memory

*Psychology: A Very Short Introduction* Gillian Butler, Freda McManus, 2014-01-23 Psychology is part of everyone's experience it influences the way we think about everything from education and intelligence to relationships and emotions advertising and criminality People readily behave as amateur psychologists offering explanations for what people think feel and do But what exactly are psychologists trying to do What scientific grounding do

they have for their approach This Very Short Introduction explores some of psychology's leading ideas and their practical relevance In this new edition Gillian Butler and Freda McManus explore a variety of new topics and ways of studying the brain Until recently it was not possible to study the living human brain directly so psychologists studied our behaviour and used their observations to derive hypotheses about what was going on inside Now through neuroscience our knowledge of the workings of the brain has increased and improved technology provides us with a scientific basis on which to understand the structure and workings of the brain and allows brain activity to be observed and measured Exploring some of the most important advances and developments in psychology from evolutionary psychology and issues surrounding adolescence and aggression to cognitive psychology this is a stimulating introduction for anyone interested in understanding the human mind ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable
