Interior Design: Conceptual Basis Anthony Sully, 2015-05-29 Maximizing reader insights into interior design as a conceptual way of thinking which is about ideas and how they are formulated The major themes of this book are the seven concepts of planning circulation 3D construction materials colour and lighting which covers the entire spectrum of a designer's activity Analysing design concepts from the view of the range of possibilities that the designer can examine and eventually decide by choice and conclusive belief the appropriate course of action to take in forming that particular concept the formation and implementation of these concepts is taken in this book to aid the designer in his/her professional task of completing a design proposal to the client The purpose of this book is to prepare designers to focus on each concept independently as much as possible whilst acknowledging relative connections without unwarranted influences unfairly dictating a conceptual bias and

is about that part of the design process called conceptual analysis. It is assumed that the site location, building and orientation as well as the client's brief of activities and needs have been digested and analysed to provide the data upon which the design process can begin. Designed as a highly visual illustrative book as the interior design medium demands, the hands-on creative process of designing is detailed with original drawn illustrations. Concentrating on the conceptual process of designing interiors and defining what these concepts are, this book will help the designer to organise his/her process of designing and to sharpen the links between the various skill bases necessary to do the job. After Taste Kent Kleinman, 2012 AfterTaste Expanded Practices in Interior Design is an edited volume comprising texts interviews and portfolios that collectively document new theories and emerging critical practices in the field of interior design The material

is informed by but not limited to the annual AfterTaste symposia hosted by Parsons The New School of Design The book's central argument is that the field of interior design is inadequately served by its historical reliance on taste making and taste makers and more recently from a set of theoretical concerns derived from architecture the volume seeks to set an expanded frame by advancing new voices and perspectives in both the theory and practice of interior design considered as an independent discipline In 2007 the Department of Architecture Interior Design and Lighting at Parsons The New School for Design inaugurated an annual international symposium series dedicated to the critical study of the interior Titled AfterTaste these yearly symposia offer expansive views of interior studies highlight emerging areas of research identify allied practices make public its under explored territory and attract future designers and scholars to the field Now in its fourth year AfterTaste has proven to be one of the very few venues internationally for critically exploring interior design The field of interior design is asymmetrically served by the current literature in the field Too frequently the current writing and making in interiors emphasize the ineffable the biographical and the social elite and promote a curiously unsubstantiated notion of connoisseurship as the principal basis for design Other attempts to construct an intellectual agenda for the study of the interior draw heavily from architectural theory ignoring the discipline's own specific and autonomous history AfterTaste the book is intended to adjust this imbalance by introducing interior design material that is theoretically and historically situated technically grounded demographically inclusive and aesthetically adventurous *Interior Design*, 1994 [Interior Design Sourcebook](#) Susan A. Lewis, 1998 This volume combines both scholarly and practical resources for interior architecture and design Back cover
