Masticatory Muscles Activities in Temporomandibular Joint Internal Derangement Chantal M. Lafrenière, 1995 Intramuscular EMG of the lateral pterygoid muscles surface EMG of the temporalis and masseter muscles electrogoniometry and force measurements of the TMJ were synchronously used to investigate the biomechanical role of the two portions of the lateral pterygoid muscle in relation to internal derangement ID of the temporomandibular joint TMJ This study dealt with the EMG analysis of five static conditions resting resisted protraction maximum voluntary contraction MVC in opening in molar and incisor clenching of TMJ ID and control subjects The analysis of variance results of the integrated linear envelop LE EMG showed no significant differences between the two groups The integrated LE EMG of the SLP was significantly lower in the TMJ group during molar clenching 104 mu V pm 60.0 over 159 mu V pm 68.8 for a p 020 The SLP

seemed to have lost its discal stabilizing function during clenching The integrated LE EMG signals of the ILP were significantly higher in the TMJ ID group during rest resisted protraction and incisor clenching $p = 0.29$ $p = 0.46$ $p = 0.31$ respectively The ILP muscle has probably adapted to control the inner joint instability while continuing its own actions The results of the isometric forces showed that TMJ ID subjects exhibited significantly lower molar bite forces 297 1N over 419N $p = 0.42$ confirming that they have less muscle strength and tissue tolerance than subjects with healthy masticatory muscle system Incisor bite forces however showed a tendency to be higher in the TMJ ID group 233N over 180 5N $p = 0.68$ possibly resulting from the training of a protracted bite and or hyperactivity of the ILP associated with ID Therefore a neuromuscular adaptation could be occurring in TMJ ID masticatory system affecting muscular actions and forces Abstract shortened by UMI

McGraw-Hill Education 5 TEAS Practice Tests, Fourth Edition Kathy A. Rowell, John Thompson Shepherd, 1996 This is the first section of the Handbook of Physiology to deal exclusively with exercise It is also the first single volume to analyze in depth the regulation and integration of motor respiratory cardiovascular and metabolic systems over the broad range of functions demanded by exercise Its systematic examination of the regulation of these four systems draws from every area of physiology as well as from pharmacology biochemistry cellular and molecular biology and medicine It highlights exercise as a uniquely powerful means of exploring the integrative aspects of whole body function One feature of this volume is its in depth analysis of the regulatory mechanisms responsible for the close matching of motor respiratory cardiovascular and metabolic control during exercise By combining studies of control at cellular and molecular levels with studies on whole animals this Handbook provides the natural and logical integration that is a hallmark of physiology and is also what lures many scientists to the study of exercise The internationally recognized authors provide a critical analysis of the mechanisms that govern control of movement breathing pulmonary gas exchange blood flow and blood pressure and skeletal muscle metabolism They examine both functional and structural limits to the performance of organ systems under severe stress and show how these limits can be altered by age and physical conditioning In some cases this requires treatment of topics that have not been reviewed before such as how the heart interacts mechanically with the

pericardium lung and chest wall to alter central hemodynamics This volume offers a unique synthesis of fresh information and ideas about the physiology of exercise that will provide a basis for future investigations in this field It sets a new standard for the physiological study of exercise and will be of keen interest and lasting value to physiologists sports scientists kinesiologists cardiologists motor control neurologists and physicians **Being Healthy 1990** Harcourt Brace Jovanovich,Harcourt Brace Staff,1990 The Journal of Rheumatology ,1989 **Being Healthy 1990** Harcourt Brace Jovanovich,Harcourt Brace Staff,1990 Journal of Speech and Hearing Research ,1994
