

The GP2015 is a small format RF Front-end for Global Positioning System (GPS) receivers. Equivalent in performance to the GP2010 but in a TQFP package, this product is suited for size-critical applications as the RF area can be reduced by a factor of two to three using miniature surface-mount passive components. The GP2015 is designed to operate from either 3 or 5 Volt supplies.

The input to the device is the L1 (1575.42MHz) Coarse-Acquisition (C/A) code Global Positioning signal from an antenna (via a low-noise pre-amplifier). The output is 2-bit quantised for subsequent signal processing in the digital domain. The GP2015 contains an on-chip synthesiser, mixers, AGC and a quantiser which provides Sign and Magnitude digital outputs. A minimum of external components is required to make a complete GPS front-end.

The device has been designed to operate with the GP2021 12-channel GPS Correlator and GP4020 GPS Baseband Processor, both available from Zarlink Semiconductor.

Technical Reference Manual for the Lumaron GPS Receiver Jonathan Edward Luminati, Jamie Tripp Marciniec, James Kristian Ronayne, 1999 *The Handbook of Disgust Research* Philip A. Powell, Nathan S. Consedine, 2021-11-16 This volume brings together the world's leading experts on disgust to fully explore this understudied behavior. Disgust is unique among emotions. It is at once perhaps the most basic and visceral of feelings while also being profoundly shaped by learning and culture. Evident from the earliest months of life, disgust influences individual behavior and shapes societies across political, social, economic, legal, ecological, and health contexts. As an emotion that evolved to prevent our eating contaminated foods, disgust is now known to motivate wider behaviors, social processes, and customs. On a global scale, disgust finds a place in population health initiatives from hand hygiene to tobacco warning labels and may underlie aversions to globalization and other progressive agendas such as those regarding sustainable consumption and gay marriage. This comprehensive work provides cutting edge, timely, and succinct theoretical and empirical contributions illustrating the breadth, rigor, relevance, and increasing maturity of disgust research to modern life. It is relevant to a wide range of psychological research and is particularly important to behavior viewed through an evolutionary lens. As such, it will stimulate further research and clinical applications that allow for a broader conceptualization of human behavior. The reader will find succinct and accessible summaries of key perspectives, highlights of new scientific developments, and a rich blend of theoretical and empirical chapters.
