A Theoretical Approach to Inorganic Chemistry A.F. Williams, 2013-11-11 Dr Alan Williams has acquired a considerable experience in work with transition metal complexes at the Universities of Cambridge and Geneva In this book he has tried to avoid the variety of ephemeral and often contradictory rationalisations encountered in this field and has made a careful comparison of modern opinions about chemical bonding In my opinion this effort is fruitful for all students and active scientists in the field of inorganic chemistry The distant relations to group theory atomic spectroscopy and epistemology are brought into daylight when Dr Williams critically and pedagogically compares quantum chemical models such as molecular orbital theory the more specific LCAO description and related ligand field theory the valence bond treatment which has conserved great utility in antiferromagnetic systems with long inter nuclear distances and discusses interesting but not too well defined concepts such as electronegativity also derived from electron transfer spectra hybridisation and oxidation numbers The interdisciplinary approach of the book shows up in the careful consideration given to many experimental techniques such as vibrational infrared and Raman electronic visible and ultraviolet Mossbauer magnetic resonance and photoelectron spectra with data for gaseous and solid samples as well as selected facts about solution chemistry The book could not have been written a few years ago and is likely to remain a highly informative survey of modern inorganic chemistry and chemical physics Geneva January 1979 C K Compounds with Cl, Br, I Irene Haas, Hartmut Katscher, Susanne Jäger, Dietrich Schneider, Joachim Wagner, 1990-11-20 Jacaranda Chemistry 1 VCE Units 1 and 2, learnON and Print Neale Taylor, Angela Stubbs, Robert Stokes, 2022-11-30 Developed by expert Victorian teachers for VCE students The NEW Jacaranda Chemistry VCE series continues to deliver curriculum aligned material that caters to students of all abilities Our expert author team of practising teachers and assessors ensures 100% coverage of the new VCE Chemistry Study Design 2023/2027 **Chemistry** David W.
