Sticking Together Jaclyn S. Gerstein,2013-08-21 First published in 2000 Experiential family counseling is an action oriented approach to family therapy Through the use of structured games and physical and intellectual challenges many clinicians find that they are able to gain insight into the behaviors and responses that perpetuate a family s problems While traditional treatment methods often become bogged down in verbal sparring or blame placing between family members experiential counseling calls for families to work together to succeed in overcoming obstacles that are set before them And because many experiential activities can be designed as

metaphors for a family's individual problems counselors using this treatment method are given an excellent opportunity to help families practice actual solutions that can be used in their daily interactions and experiences. In *Sticking Together* Jackie Gerstein has given therapists and family counselors a wonderful tool for introducing experiential counseling into their own practices. In addition to a thoughtful overview of the general uses and benefits of this unique technique, she also provides practical guidelines for developing experiential family counseling sessions. Key features include:

- A core section of experiential activities, games and exercises for family therapy.
- Cautions that should be observed when using these activities with certain populations.
- Detailed processing questions with each exercise that can help families to interpret the results of experiential activities.
- Suggestions to encourage family goal setting.
- A discussion on the need for ongoing assessment during the course of experiential therapy.
- Samples of important documents necessary in experiential therapy programs, including performance agreements and informed consent forms.

With an easy to use format, *Sticking Together* offers readers an extensive selection of family building initiatives that promise to introduce fun into the vocabulary of family therapy.

Doan, 1994-09-09 Once upon a time everything was understood through stories The philosopher Friedrich Nietzsche once said that if we possess our why of life we can put up with almost any how Stories always dealt with the why questions The answers they gave did not have to be literally true they only had to satisfy

people's curiosity by providing an answer less for the mind than for the soul. From Chapter 1 Each of us has a story to tell that is uniquely personal and profoundly meaningful. The goal of the modern therapist is to help clients probe deeply enough to find their own voice, describe their experiences and create a narrative in which a life story takes shape and makes sense. Emphasizing the vital connections among personal experience, family and community, the authors of this provocative new book explore the role of narrative therapy within the context of a postmodern culture. They employ the interactional dynamics of family therapy to demonstrate how to help people deconstruct oppressive and debilitating perspectives, replace them with liberating and legitimizing stories and develop a framework of meaning and direction for more intentional, more fulfilling lives. Blending scientific theory with literary aesthetics, *Story Re Visions* presents a comprehensive collection of specific narrative therapy techniques, inventions, interviewing guidelines and therapeutic questions. The book examines the development of the postmodern phenomenon, tracing its evolution across time and disciplines. It discusses paradigmatic traditions, the meaning of modernism and the ways in which the ancient binding narratives have lost their power to inspire uncritical assent. Methods for doing narrative therapy in a destoried world are presented with suggestions for meeting the challenges of postmodern value systems and ethical dilemmas. Numerous case examples and dialogues illustrate ways to help people become authors of their own stories and each of the last four chapters concludes with an appendix that provides additional information for the practicing clinician. Detailing ways in which a narrative framework enhances family therapy, the authors describe how the therapist and client may act together as revisionary editors and present techniques for keeping the story re vision alive, well and in charge. Finally, the book examines re vision techniques for clinical training and supervision settings, with discussion of how therapists may help one another create stories about their clients as well as themselves. Accessibly written and profoundly enlightening, *Story Re Visions* is ideal for family therapists, psychologists, psychiatrists and anyone else interested in doing therapy from a narrative stance. It is also valuable as supplemental reading for courses in family therapy and other psychotherapeutic disciplines.

The leading teachers and practitioners in this powerful handbook represent a variety of schools of therapeutic treatments that all share an optimistic view of people as resourceful individuals who construct their own realities.
