Periods and Groups

The horizontal rows in the table are referred to as **periods**, which are numbered from 1 to 7. The columns are referred to as **groups** or **families**. The numbering system for groups varies between textbooks and instructors. The newest numbering system keeps things simple; groups are numbered from 1 to 18 (as shown on your periodic table).

The “old school” numbering system separates the groups into two categories: “A” group elements (also known as main group elements) and “B” group elements (also known as transition elements or transition metals). The main groups make up the left and right sides of the periodic table and are labeled in order from 1A-8A. The transition metal groups are located in the middle of the periodic table and are labeled in a bizarre fashion that goes in this order: 3B, 4B, 5B, 6B, 7B, 8B, 1B, 2B. (To make matters even more confusing, “group” 8B is actually made up of *three* groups of elements!)

Needless to say, we’re going to focus on the newest numbering system, with groups numbered from 1-18. But, since some textbooks still use the old numbering system, it is important to be familiar with both. On your periodic table, please label the **main groups** with the old numbering system in addition to the new numbering system. (Group 1 = Group 1A, Group 2 = Group 2A, Group 13 = Group 3A, Group 14 = Group 4A, etc.) Don’t worry about re-labeling the transition metals. Use the diagram above as a guide.
