## Go Math Grade 3 Lessons:

**Teaching Powerful Problem-Solving in Math** Catherine C. Lewis, Akihiko Takahashi, Shelley Friedkin, Nora Houseman, Sara Liebert, 2025-08-22 *Teaching Powerful Problem Solving in Math* provides the first in depth portrait of schoolwide lesson study showing how U S teachers at several schools used it to implement powerful problem based mathematics instruction. Students learn mathematics by confronting a novel problem and building the new understanding of the mathematical concepts needed to solve it just as mathematicians would. By learning in this way students discover the power of their own thinking and gain confidence that extends well beyond mathematics. This book introduces readers to urban elementary and K 8 schools where teachers have dramatically transformed math learning for teachers and for students. Readers will follow teachers as they transform instruction using schoolwide lesson study building powerful new ways for educators to learn from each other and practice innovative teaching techniques. The authors use in depth classroom portraits from the outset of schoolwide lesson study and three years later to illuminate the changes in mathematics instruction at a school that raised its proficiency on Smarter Balanced Assessment from 15% to 56%. Extensive resources and links are provided to help readers understand and build on the work of these schools which is grounded in established principles of collective efficacy, intrinsic motivation and learner agency for both students and teachers. **Book Features:** Shows how teaching through problem solving can erase the achievement gap in mathematics learning. Provides the first in depth portrait of schoolwide lesson study showing how U S teachers at several schools build it and use it to transform teaching. **Profiles:** teachers leading the transformation of instruction to achieve the ambitious vision of learning embodied in recent standards. Uses photographs, student work and detailed classroom descriptions to bring to life mathematics lessons in year 1 and year 4 of the school's work to build problem solving. Provides examples and links to the strategies teachers use to make student thinking visible and actionable during mathematics lessons. Includes lesson plans, photographs of board work, student journals, school newsletters, self assessment rubrics and dozens of links to the resources needed to begin using teaching through problem solving and school wide lesson study. Provides long term teacher led solutions for professional learning and for mathematics instruction that have been shown to improve teacher retention and student proficiency.

**Hands-On Mathematics, Grade 3** Jennifer Lawson, 2006 *This teacher resource offers a detailed introduction to the Hands On Mathematics program guiding principles, implementation guidelines, an overview of the processes that grade 3 students use and develop during mathematics inquiry, and a classroom assessment plan complete with record keeping templates and connections to the Achievement Levels outlined in the Ontario Mathematics Curriculum. It also provides strategies and visual resources for developing students' mental math skills. Each unit is divided into lessons that focus on specific curricular expectations. Each lesson has materials lists, activity descriptions, questioning techniques, problem solving examples, activity centre and extension ideas, assessment suggestions, activity sheets and visuals.* Portage Main Press
