

RESEARCH AIM AND OBJECTIVES

RESEARCH AIM

The research aim refers to the overarching goal or purpose of a research study, stating what the researcher intends to achieve or investigate. It provides direction and focus to the research, guiding the selection of research questions, methods, and data analysis to address specific objectives and contribute to existing knowledge in the field.

RESEARCH OBJECTIVES

Research objectives are specific and measurable goals that outline what the researcher will accomplish within a study. They are derived from the research aim and serve as the building blocks for the research design, helping to define the scope, identify the variables to be studied, and guide data collection and analysis to ultimately fulfill the research aim.

Multiple Goals in Discourse Karen Tracy, Nikolas Coupland, 1990 The studies in this monograph share two common features a recognition of the intertwined nature of goal and discourse and a recognition that

people typically have more than one goal when they talk with others. It is essential that goals and discourse be conceived of as intertwined concepts. If talk is conceived as essentially a mode of action, then these actions will often be taken in the pursuance of objectives. Correspondingly, if we assume that people approach many social episodes with specific designs, ambitions, wishes, probably also misgivings and avoidances, then it seems natural to look at talk as at least a potential goal fulfillment mechanism.

The Millennium Development Goals for Health Adam Wagstaff, 2004-01-01. Annotation: Provides information on progress and trends including poor/non-poor disparities, health systems reform as a means of laying building blocks for the efficient and equitable delivery of effective interventions, the financing of health spending through domestic resources and aid, and improving the effectiveness of development assistance in health. Linking the health Millennium Development Goals agenda with the broader poverty reduction agenda, this book is a valuable resource for policymakers in developing countries and development practitioners working in the health, nutrition, and population sector, as well as students and scholars of public health.

UN's Sustainable Development Goals as Paradigm Change? Max Schmidt, 2019-11-07. Literature Review from the year 2019 in the subject Politics. Environmental Policy, grade 1-3. University of Leipzig. Institute of Political Science. course: Application-oriented introduction to qualitative methods of political science. language: English. abstract: This paper strives to provide an overview of the critical academic engagement with the Sustainable Development Goals (SDGs). This literature review is structured as follows: Firstly, a short introduction to the key terms facilitated in this paper will be given, development and its distinction to sustainable development. Secondly, the underlying methodology of critical discourse analysis (CDA) and its differentiation from discourse analysis (DA) will be presented in order to embed the subsequent overview. Finally, some main findings will be compared with the contribution of CDA to development studies. In late 2015, one of the most far-reaching consensus in the world was unanimously agreed upon by the 193 countries of the United Nations General Assembly: the Sustainable Development Goals (SDGs). Set out to fulfil

ambitious development targets by 2030 ranging from the complete eradication of poverty in all its forms everywhere Goal 1 to strengthening the Global Partnership for Sustainable Development SD Goal 17 this framework is part of the so called Post 2015 Development Agenda respectively 2030 Agenda eponymous by the main document constituting the SDGs passed by the UN in 2015 As the intended outcome of this process which was initiated in 2012 the SDGs are the legitimate successor of the Millenium Development Goals MDGs a set of eight goals that were promised to be reached by 2015 by the UN Millenium Declaration passed in 2000 Facing manifold shortcomings of the MDGs which were measured by a mere 18 targets the SDGs were extended to 17 goals measured by 169 targets Unsurprisingly and especially regarding their abundance the SDGs faced harsh critique from most diverse commentators In one of its issues in March 2015 the internationally renowned weekly newspaper The Economist for example portrayed the SDGs as even worse than useless Due to their presumably bloated nature as a myriad of top down targets The Economist 2015 they would not only distract from poverty eradication as the potentially most important goal but also overlook the importance of local contexts ultimately resulting in cookie cutter development policies Ibid However the majority of publication organs and stakeholders in the international development community did not articulate an equally harsh and narrow critique as the goals of the SDGs seem difficult to contradict at least on first glance
