

## Interpreting Events from Fossil Evidence

### Pre-Lab Discussion

A *fossil* is any evidence of life in the prehistoric past. Fossils can be actual remains of animals, impressions, carbon residues, or tracks left by a living organism. By using fossil records, scientists are able to piece together the story that fossils tell about the history of the Earth.

In this investigation, you will use some present-day knowledge and common sense to interpret fossil evidence.

### Problem

### Materials (per student)

Pencil

### Procedure
