David N. Figlio,Cecilia Elena Rouse,2008 We study the effects of the threat of school vouchers and school stigma in Florida on the performance of low performing schools using student level data from a subset of districts Estimates of the change in school level high stakes test scores from the first year of the reform are consistent with the early results used by the state of Florida to claim large scale improvements associated with the threat of voucher assignment However we also find that much of this estimated effect may be due to other factors While we estimate a small relative improvement in reading scores on the high stakes test for voucher threatened stigmatized schools we estimate a much smaller relative improvement on a lower stakes nationally norm referenced test Further the relative gains in reading scores are explained largely by changing student characteristics We find more evidence for a positive differential effect on math test scores on both the low and highstakes tests however the results from the lower stakes test appear primarily limited to students in the high stakes grade Finally we find some evidence that the relative improvements following the introduction of the A Plan by low performing schools were more due to the stigma of receiving the low grade rather than the threat of vouchers Abstract **Show What You Know on the 5th Grade Fcat** ,2007 5th Grade FCAT Student WorkbookThe Show What You Know on the 5th Grade FCAT Student Workbook helps students prepare specifically for the Reading Mathematics and Science tests A Practice Tutorial and Assessment for Reading Mathematics and for Science also helps students practice critical thinking skills with multiple choice gridded response and short and extended response questions aligned to the Sunshine State Standards Chapters to help students reduce test anxiety and learn test taking strategies are also provided to ensure student success on the FCAT **The Monday Report** Florida.
