- Do not yet remove the band which holds the spools together.

2 tabs

- ④ Hold the empty spool so that the end with only one slot is on the left, and lower the spools into the front of the printing compartment. The gears in the ends of the spool with film should fit into the slots on each side of the printing compartment.

- ⑤ Cut the band which holds the spools together with scissors, and remove it. Insert the remaining gear into the right end of the empty spool and the flange into the left end of the empty spool. Make sure the tabs on the gear and the flange fit into the slots in the ends of the spool (the gear has two tabs and the flange has one tab).

- ⑥ Pull the empty spool toward the back of the compartment, unwinding the film as you pull.

- ⑦ Insert the empty spool into the back of the compartment so that the gear and the flange fit into the slots on the sides of the compartment.

- Make sure that the gear engages with the gear below it.

- ⑧ Wind the film slightly (rotate the gear on the right side of the empty spool) so that there is no slack in the film. Make sure that both edges of the film wind onto the spool evenly.

- ⑨ Close the print compartment cover, making sure it clicks into place.

- **Caution!** Close the cover slowly to make sure it doesn't pinch your fingers.

- ⑩ Load paper in the paper tray and then press the following keys to initialize the film.

**Note:** Paper must be loaded before the film can be initialized. To load paper, see Loading the Printing Paper.
