**Women Street Hustlers** Barbara A. Rockell,2008 While the number of women in U S jails remains low in comparison with the number of men over the past 10 years their admission rate has soared and now surpasses the rate of increase for men While demographic information is available on these women it tells us little about who they are as people how they become repeat offenders or how they survive on the street The author sheds light on these issues in a study of female repeat offenders admitted to a New York state jail Despite the women s self defeating behaviors many of them reveal a surprising degree of initiative and self sufficiency This finding runs counter to previous research in which drug use and criminal activity by women have been viewed as reflecting the perpetrators victim status and lack of agency The author argues for seeing these behaviors in a broader social context and suggests avenues for future study as well as more humane and constructive intervention strategies    **Female Juvenile Prostitution** ,1992    **Mole (Mind of Legacy Escapes)** Legacy M.
