Calculation Hank Rutkowski, 1986 What size AC system do I need for my home ? Charles Nehme, Choosing a new air conditioning system for your home is one of the most significant and costly decisions a homeowner will make Yet for too long this process has been shrouded in technical mystery and often reduced to guesswork The conventional wisdom or lack thereof has resulted in millions of American homes being cooled by systems that are either oversized or undersized An oversized unit doesn't just waste energy it short cycles failing to run long enough to properly dehumidify your home leaving the air feeling clammy and uncomfortable An undersized unit runs endlessly struggling to keep up during the hottest months leading to high utility bills and premature system failure Neither scenario provides the comfort and efficiency you paid for This book is a homeowner's essential guide to conquering the guessing game of HVAC sizing We strip away the jargon and walk you through the precise science backed methodology used by professionals the Manual J Load Calculation By the end of this journey you won't just know what size AC you need you'll understand why a critical distinction that empowers you to work confidently with contractors and ensure your home is perfectly cooled for decades to come Comfort efficiency and peace of mind are within your reach **Manual J** Hank Rutkowski, Air Conditioning Contractors of America, 1986
