Committee on Rational Transformations,Virgil Snyder,1928 *Geotiles* ,1987 *Selected Topics in Algebraic Geometry* National Research Council (U.S.). Committee on Rational Transformations,Virgil Snyder,1970 This book resulted from two reports published in 1928 and 1932 of the Committee on Rational Transformations established by the National Research Council The purpose of the reports was to give a comprehensive survey of the literature on the subject Each chapter is regarded as a separate unit that can be read independently *THE EDUCATIONAL TIMES, AND JOURNAL OF THE COLLEGE PRECEPTORS*. c.f hodgson and sons,2, gough square,1880 **Engineering News-record** ,1905 *Mathematics and Science Achievement State by State*, 1998 Cynthia Prince,1998 *the educational times* ,1882 **Enriques Surfaces I** François Cossec,Igor Dolgachev,Christian Liedtke,2025-05-21 This book consisting of two volumes gives a contemporary account of the study of the class of projective algebraic surfaces known as Enriques surfaces These surfaces were discovered more than 125 years by F Enriques in an attempt to extend the characterization of rational algebraic curves to the case of algebraic surfaces The novel feature of the present exposition is that no assumption on the characteristic of the ground field is assumed This requirement calls for exploring the geometry of such surfaces by purely geometric and arithmetic methods that do not rely on transcendental methods such as the theory of periods of algebraic surfaces of type K3 which are close relatives of Enriques surfaces Some of the methods use many technical tools from algebraic geometry that are discussed in Volume 1 and may be a useful source of references for the study of algebraic surfaces over fields of positive characteristic Volume 1 also contains a detailed exposition of the theory of elliptic surfaces over fields of arbitrary characteristic The first volume is an essential and greatly extended revision of Enriques Surfaces I published in 1989 by Birkhäuser and co authored by F Cossec and I Dolgachev Included is a new chapter devoted to the theory of moduli of Enriques surfaces The two volumes together contain many examples and an extensive bibliography made up of more than 700 items *Whitaker's Cumulative Book List* ,1952 **Philippine Education** ,1909 **Enriques Surfaces II** Igor Dolgachev,Shigeyuki Kondō,2025-03-25 This book consisting of two volumes gives a contemporary account of the study of the class of projective algebraic surfaces known as Enriques surfaces These surfaces were discovered more than 125 years by F Enriques in an attempt to extend the characterization of rational algebraic curves to the case of algebraic surfaces The novel feature of the present exposition is that no assumption on the characteristic of the ground field is assumed This requirement calls for exploring the geometry of such surfaces by purely geometric and arithmetic methods that do not rely on transcendental methods such as the theory of periods of algebraic surfaces of type K3 which are close relatives of Enriques surfaces Some of the methods use many

technical tools from algebraic geometry that are discussed in Volume 1 and will be a useful source of reference for the study of algebraic surfaces over fields of positive characteristic Volume 1 also contains a detailed exposition of the theory of elliptic surfaces over fields of arbitrary characteristic The second volume discusses many new topics for example the theory of automorphisms of Enriques surfaces and the relationships with hyperbolic geometry Together the two volumes contain many examples and an extensive bibliography made up of more than 700 items Engineering News ,1905 **Mathematics And Science Achievement State By State, 1998** , Reading Achievement State by State, 1999 ,1999
