Nairne, 2000 James Nairne's highly respected and accessible new edition offers all the

content pedagogy and visual appeal that professors and students have come to expect from a successful introductory psychology text and more Nairne's Second Edition offers a cohesive look at how psychology works in our everyday lives. This practical motivating text presents all the topics you cover in your introductory course but connects them in a way that adds meaning and consistency to your students' study of the discipline. And how does it do this? By introducing students to the adaptive mind, a theme based on the realization that our thoughts and actions stem from our need to adapt to our surroundings. This unique framework stresses practical applications and helps students understand how we use psychology to deal with everyday challenges. Nairne builds all topics around an adaptive problem solving framework. He emphasizes the way that particular behaviors, thoughts, processes, and emotions help people solve problems, from memorizing a telephone number to ducking under cover as a building begins to shake to producing a quick physical response in the face of traffic hazards. This organizational framework also promotes a common theme of understanding across the chapters. This innovative approach may differ from the presentation you have come to expect from other texts. But beneath the innovation you'll find ample coverage of all the traditional topics around which you build your course.
