Federal Register ,2013 How China is Reshaping the Global Economy Rhys Jenkins,2022-06-16 China's growing economic involvement in Sub Saharan Africa and Latin America has been a source of major controversy. The official Chinese position maintains that the growth of bilateral relations is of mutual benefit and provides a good example of South South cooperation. Critics on the other hand see the economic relations between China and other developing countries as highly unequal with most of the benefits accruing to China and a few local elites. They also point to negative socio economic political and environmental consequences. How China is Reshaping the Global Economy Development Impacts in Africa and Latin America throws more light on these controversies through a comparative study of China's impact on the two regions. It looks not just at bilateral relations between China and the two regions but also analyses the changes in the global economy brought about as a result of the shift in economic activity from North America and Western Europe to Asia. This book looks at the factors which led to rapid economic growth in China and the way in which this has affected global manufacturing commodity markets, the international presence of Chinese companies and financial flows. It examines the different forms of Chinese economic involvement in Sub Saharan Africa and Latin America, the main drivers and economic social political and environmental consequences. It ends with a comparison of the two regions that highlights the importance of different histories and political and institutional contexts in determining the impacts of China. Since the first edition of How China is Reshaping the Global Economy Development Impacts in Africa and Latin America China's role in the global economy has continued to expand and the Chinese government's foreign policy has become more assertive. The global presence of China has been marked by the expansion of the Belt and Road Initiative to almost 150 countries and the trade war between the US and China as well as increased Western concerns over the activities of major Chinese companies such as Huawei. This new edition documents these changes and their implications for SSA and LAC. **Myanmar** Chenyang Li,Chaw Chaw

Sein,Xianghui Zhu, Located at the junction of East Asia South Asia and Southeast Asia Myanmar is one of the most important countries in the world's geopolitical landscape. Its ongoing political and economic reforms arouse growing concern from the international community especially great powers like the US Japan India and China. Will the domestic reform bring Myanmar back to the international community? How and to which extent does the domestic reform change Myanmar's relations with other countries? This book is based on papers presented at an international conference on Myanmar held at the Institute of Myanmar Studies in Yunnan University China in 2014. Based on their long term observation and studies experts from China Laos Myanmar Germany Singapore and the US share their opinions on Myanmar's domestic reform and foreign relations as well as the current situation and future prospect. This book contributes to better understanding of Myanmar in its dramatic political and social transition. **Tourism, Change and the Global South** Jarkko Saarinen,Jayne M. Rogerson,2021-06-16

This significant volume is the first to focus on both the changing nature of tourism and the capacity of tourism to effect change especially in the Global South Geographically this changing nature of tourism is based on the transforming relationships between demand supply and location While this is nothing new in tourism recent decades have intensified the changing characteristics of global tourism From another perspective tourism represents a change and nowadays many localities and regions aim to use tourism as a tool for positive change i e development However this has turned out to be a challenging task in practice especially in the Global South context where the relationship between tourism growth and local development has often been controversial This book looks at a host of critical concepts in one volume such as growth and development adaptation and resilience sustainability and responsibility governance and planning and heritage and destination management strategies By understanding the drivers of change this book sheds new insight into the promise and role of sustainability and responsibility in tourism development This book will be of great interest to all upper level students academics and researchers in the fields of Tourism Geography and Cultural and Heritage studies
