Food Industry Quality Control Systems Mark Clute, 2008-10-22 After a sordid litany of recalls courtesy of the food industry consumers are pointing the finger at companies that have failed to institute proper recall prevention techniques While historical analysis shows no company is exempt from recall risk most can be prevented with an efficient and verifiable quality control program Authored by a 20 year

Manual of Food Quality Control, 1979 **Whole genome sequencing as a tool to strengthen foodborne disease surveillance and response. Module 1** World Health Organization, 2023-10-19 Globally there is growing recognition of foodborne diseases as a public health priority From a public health perspective foodborne diseases are largely preventable and can be controlled through effective food safety systems that evaluate hazards along the food chain from production to consumption An integrated food chain surveillance system can detect and monitor foodborne bacteria including antimicrobial resistant bacteria throughout the food chain Whole genome sequencing WGS has the potential to change how we detect and monitor microbial hazards in the food chain as well as how we assess investigate and manage food safety risks It is anticipated that this new technology will help reduce the burden of foodborne diseases given its advantages over previous low resolution typing and detection methods The purpose of this manual is to provide guidance on The capacities that need to be in place before WGS can be useful for foodborne disease surveillance and response The options for implementing WGS and How to implement WGS within existing surveillance and response systems The present module introduces WGS and its relevance to foodborne diseases it defines the minimum capacities needed before a country can implement WGS for outbreak investigations and routine surveillance and includes a section to assist countries in selecting an option for implementing WGS within their existing surveillance and response system

Whenever I step into an aeroplane I cannot avoid considering the risks associated with flying Thoughts of mechanical failure pilot error and terrorist action fill my mind I try to reassure myself with statistics which tell me there is greater chance of injury crossing the road The moment the plane takes off I am resigned to my fate placing faith in pilots who are highly qualified and superbly trained for the task of delivering me safely to my destination To be a passenger in an aeroplane is to express faith in the systems used by the airline It is to express a faith in the quality of the airline's organisation and the people who work within it The same is true of surgery Thoughts of mortality are difficult to avoid when facing the surgeon's knife However faith in the surgeon's training and skill faith in the anaesthetist and theatre technicians faith in the efficient resources and quality of the hospital all help to convince that there is little need to worry Apart from flying and surgery there are many facets of life which entail risk but knowing the risks we willingly place our confidence in others to deliver us safely In the consumption of food however few of us consider the risks Everyday if we are fortunate we eat food Food sustains and gives us pleasure Food supports our social interactions
